Lump Sum Scheme

**Product
Disclosure
Statement**

Date of issue: 30 September 2025

Super SA

Important Information

Disclaimer

This Product Disclosure Statement (PDS) provides a general summary to help you understand your entitlements in the Lump Sum Scheme. Super SA does its best to make sure the information is accurate and up-to-date. However, you need to be aware that it may not include all the technical details relevant to the topic. For the complete rules of the Lump Sum Scheme, please refer to the *Superannuation Act 1988*. The Act and accompanying Regulations set out the rules under which the Lump Sum Scheme is administered and entitlements are paid. You can access a copy from the Super SA website at supersa.sa.gov.au.

The Lump Sum Scheme is an exempt public sector superannuation scheme and is not regulated by the Australian Securities and Investments Commission (ASIC) or the Australian Prudential Regulation Authority (APRA). We are not required to hold an Australian Financial Services (AFS) licence to provide general advice about the Lump Sum Scheme. However, we make every attempt to comply with the spirit of the financial services regulations.

The information in this PDS is of a general nature only and has been prepared without taking into account your objectives, financial situation or needs. Before acting or relying on this information, you should consider its appropriateness in the context of your own objectives, financial situation or needs. You should also seek professional financial advice before making any financial decisions.

Super SA and the State Government disclaim all liability for all claims, losses, damages, costs or expenses whatsoever (including consequential or incidental loss or damage), which arise as a result of or in connection with any use of, or reliance upon, any information in this PDS.

About this document

This Product Disclosure Statement (PDS) provides you with a general description of the Lump Sum Scheme and its features. If you are seeking advice that takes into account your objectives, financial situation or needs, you will need to contact a licensed financial adviser.

The issuer of this PDS is the South Australian Superannuation Board, established under Section 6 of the *Superannuation Act 1988*, and conducting business under the name of the Super SA Board. The Super SA office is the administrator of the Scheme and is a branch of the Department of Treasury and Finance of the Government of South Australia.

Changes to Acts and Regulations are effective from the date specified in the legislation. Updates to this PDS will be available on the Super SA website at supersa.sa.gov.au. An up to date version of this PDS will always be available to download from the website. The website can be accessed at any time to review information.

As an exempt fund, we are not required to produce a PDS, but have prepared this document so you can understand your entitlements and options and the rules of the Scheme.

1. The Lump Sum Scheme

1.1 Welcome

Superannuation is an important part of your financial planning. It can play a significant role in helping you achieve the lifestyle and income that you want in retirement.

Past and present SA public sector employees enjoy the benefits of being members of the Lump Sum Scheme.

The Lump Sum Scheme was established on 1 July 1988 and closed to new members on 3 May 1994. It is administered under the provisions of the *Superannuation Act 1988* and provides a lump sum entitlement on retirement with provision for entitlements in the event of death, total and permanent disablement and upon resignation.

The information in this PDS is designed to give you a better understanding of the Lump Sum Scheme and the options and benefits that it offers.

We encourage you to read it and keep it as a reference. In section 11 of this PDS you will find a Glossary, which explains many of the terms used throughout the PDS.

The contents of this PDS will continue to be updated regularly, and the most up-to-date version is always available to download from the Super SA website at supersa.sa.gov.au.

If, after reading it, you have any questions or require further information, contact Super SA on **1300 369 315**. Super SA can also be contacted by email at supersa@sa.gov.au.

Additionally, a comprehensive range of fact sheets and other information is available on the Super SA website.

1.2 Understanding your super components

Your super is made up of an Employer Component and a Member Component.

Employer Component

Your Employer Component is, in most cases, defined and calculated according to the following criteria:

- age at leaving the Scheme
- number of months of contributory membership
- elected contribution rate
- proportion of time worked during your contributory membership
- your Entitlements Superannuation Salary (ESS)
(See Glossary of terms).

Public Sector Employee Superannuation Scheme

Some members may also have a Public Sector Employee Superannuation Scheme (PSESS) entitlement, which forms part of their Employer Component and is shown separately on their Annual Statement.

The PSESS Scheme was introduced by the then State Government on 1 January 1988 in lieu of a pay increase for SA public sector employees.

It represented a payment equal to 3% of your salary, which was paid into your PSESS Account. PSESS closed on 30 June 1992 and the balances were transferred to the Lump Sum Scheme.

Member Component

Your Member Component is made up of your:

- Member Account
- Rollover Account (if any).

Member Account

Your Member Account is made up of the contributions you have made to the Lump Sum Scheme plus investment earnings.

Rollover Account

Your super contributions invested with other schemes can be transferred to the Lump Sum Scheme. This is called “rolling over” your funds. By rolling this super into the Lump Sum Scheme you may minimise the fees that you pay.

To consolidate your super into the Lump Sum Scheme:

1. Log into your myGov account and link to the Australian Taxation Office (ATO)
2. Go to the 'Super' tab, click 'Manage' and then 'transfer' the super funds you wish to transfer from and to
3. Select the accounts you wish to transfer.

Alternatively, you can roll in using a form:

1. Complete one Consolidate your Super form for each super account you want to roll in. The Consolidate your super form is available on the Super SA website
2. Send your form(s) to Super SA. We will request the roll in from your other super fund(s).

When we have received the roll in, we will write to you and let you know.

You may wish to seek financial advice regarding rolling in your funds and you should consider whether you will lose any features, such as insurance, if you roll over your other funds.

Your Rollover Account is comprised of:

- amounts you have rolled over from other schemes
- investment earnings on rolled-over amounts.

You will not be able to access any of these rollover funds while you are working for the SA Government. This includes any funds that are non-preserved. Once you have left your employment with the SA Government, rollover funds are accessible subject to Australian Government preservation rules (see section 11: Glossary of terms)

Lump Sum Scheme members will also have an account in Triple S if they:

- make salary sacrifice contributions
- receive the super co-contribution
- become a non-contributory member of the Lump Sum Scheme
- have more than one employer in the SA Government with hours exceeding one full-time equivalent (FTE)
- have a permanent position (FTE or less) plus a casual position in the SA Government.

1.3 Your entitlements

An entitlement is payable upon:

- Retirement
- Resignation
- Resignation, where you receive a Targeted Voluntary Separation Package
- Retrenchment
- Temporary disablement
- Total and permanent disablement
- Death
- Transition to Retirement.

1. The Lump Sum Scheme (continued)

Your entitlements and financial hardship

As a member of the Lump Sum Scheme you can only apply for an early release of superannuation on compassionate grounds and/or severe financial hardship from the Rollover Account component of your scheme. An early release of benefit cannot be paid from your Member Account, PSESS Account (if any) or Defined Benefit component.

Financial Advice

If you consult a financial adviser additional fees will be payable. For more information refer to the Statement of Advice (SOA) received from your financial adviser.

More information about financial planning is available on the Super SA website.

1.4 The Super SA Board

The Super SA Board is responsible for managing the Lump Sum Scheme in line with the appropriate Acts and legislation.

The Super SA Board may use the services of professionals such as auditors, administrators, lawyers, actuaries and consultants to fulfil its responsibilities.

The Super SA Board comprises of a presiding member, two members appointed by the Governor and two members elected by Scheme members.

1.5 Complaints resolution process

Super SA aims to resolve all matters through its internal enquiry and disputes resolution processes.

If you are dissatisfied with a product or service provided by Super SA, you can escalate the matter by lodging a formal complaint with Super SA. Complaints may be submitted in the following ways:

Website: Complete and submit the Member Complaint Form online or download the Member Complaint Form and send to Super SA via email or post.

Email: supercomplaints@sa.gov.au

Mail: Dispute Resolution Team, Super SA,
GPO Box 48, Adelaide SA 5001

Member Centre: Ground Floor 151 Pirie Street, Adelaide

Telephone: 1300 369 315

If you are dissatisfied with the decision made by Super SA, you may request a review of the decision in writing to the Super SA Board or the South Australian Civil and Administrative Tribunal (SACAT). An application to review a decision must be lodged within three months of receiving notice of the decision. Alternatively, you may refer the matter to the State Ombudsman.

For further information regarding Super SA's complaint and external resolution process, including relevant timeframes, please refer to supersa.sa.gov.au.

1.6 Funds SA

Funds deposited in the Lump Sum Scheme are invested by specialist investment manager, Funds SA.

Funds SA is a statutory authority established by the State Government to manage the investments of the State public sector superannuation schemes. Funds SA develops investment strategies for each of the schemes and implements the strategies using a "manager of managers" approach.

This means Funds SA engages a range of specialist investment management firms to manage the funds. This provides a high degree of diversification with respect to investment categories, managers, markets and the underlying investments. By focusing on diversification, Funds SA ensures that funds are not excessively dependent on the performance of one single asset category, manager, market or investment.

1.7 Privacy

Your personal information and super details are confidential. Under the Act, information about your entitlements can only be disclosed:

- as required by, or under, any State or Commonwealth Act
- to you, or to someone else, with your consent
- to your employing agency
- on application, to your spouse or former spouse, under the *Family Law Act 1975*
- to any other person for purposes related to the administration of the Act
- as may be required by a Court of Law.

For further details on our Privacy Policy, please refer to supersa.sa.gov.au/privacy-policy.

2. Grow your super

2.1 Member contributions

As a member of the Lump Sum Scheme you contribute a percentage of your salary, which is deducted by your payroll office from your after-tax salary and credited to your Member Account. Your average contribution rate throughout your membership needs to be 6% to obtain your maximum entitlement. You can elect to contribute either 3%, 4.5%, 6%, 7.5% or 9% of your salary to the Lump Sum Scheme.

Any variation from the 6% contribution rate may have an effect on your final entitlement, and you should contact Super SA to discuss your options.

Changes to contribution rates are effective on 1 July each year. As such, applications must be received by the preceding 30 April. The **Change to Contribution Rate** form can be downloaded from the Super SA website.

Points

To assist in working out your final Employer Component, Points are allocated in line with your rate of contribution and your hours of employment.

The number of Points you accumulate, based on the actual contributions you are paying, are known as your Accrued Points. The number of Points you would accumulate if you contributed at the standard contribution rate for your hours of employment are known as your Standard Points.

As a general rule, if you are working full-time and making after-tax contributions at the 6% standard contribution rate, you will accumulate one Point for each complete month that you are a contributory member of the Scheme.

The maximum Employer Component is achieved after 420 months (35 years) of contributory membership on cessation of employment, on or after, age 60.

If there is a shortfall in Points resulting from periods of contributing less than the standard contribution rate, your final Employer Component will be reduced. However, averaging more than your standard contribution rate throughout your public sector employment does not increase your final Employer Component beyond the maximum as described above. Instead, when you retire you will be refunded the balance of your contributions, with investment earnings, as part of your Member Account.

To calculate your final entitlement, your Accrued Points are compared to your Standard Points. Any shortfall between your Accrued Points and your Standard Points reduces your final Employer Component.

If you are an Active Member, your Annual Statement shows both your Accrued and Standard Points to help you keep track of your Points. You can see if your Accrued Points are at least equal to your Standard Points so that you remain eligible for your maximum achievable Employer Component.

Circumstances that can cause a shortfall in Points

There are three circumstances that can cause your Points to accrue at a lower than standard rate and therefore reduce your final Employer Component:

1. Averaging less than your standard contribution rate during your contributory membership of the Scheme.
2. Being employed part-time during your membership of the Scheme.
3. Having periods of membership when you do not contribute.

1. Averaging less than your standard contribution rate during your contributory membership of the Scheme.

If you choose to reduce your elected contribution rate at any time, you accrue fewer Points. However, you are able to contribute at greater than your standard contribution rate to catch up your Points later on.

For example, if you are working full-time but only contributing 3% of your salary instead of your standard rate of 6%, you will accumulate 0.5 of a Point each month instead of 1 Point.

You will be able to catch up Points at some time in the future by contributing at 7.5% (1.25 Points per month) or 9% (1.5 Points per month).

Example

Peter works full time but has chosen to contribute for one financial year at 3% instead of the standard contribution rate of 6%. Therefore, he accumulates:

$$12 \text{ months} \times 0.5 \text{ (i.e. } 3\% \div 6\%) \text{ Points per month} \\ = 6 \text{ Points for the year}$$

If Peter had contributed at his standard contribution rate of 6% his Points would have been:

$$12 \text{ months} \times 1 \text{ (i.e. } 6\% \div 6\%) \text{ Points per month} \\ = 12 \text{ Points for the year}$$

For Peter to achieve a standard contribution rate of 6% over his total contributory membership, he can elect to contribute at 9% for one financial year. His Points would then be:

$$12 \text{ months} \times 1.5 \text{ (i.e. } 9\% \div 6\%) \text{ per month} \\ = 18 \text{ Points for the year}$$

During these two financial years, Peter has accumulated 6 Points for the first year and 18 Points for the second year, accruing 24 Points over the two-year period. He has, therefore, "caught up" in the second year the Points required to meet his Standard Points.

You should always check with Super SA or your financial adviser when considering altering your contribution rate to ensure the amendment will have the desired effect on your final Employer Component.

2. Grow your super (continued)

2. Being employed part-time during your Scheme membership.

Part-time employment will reduce the number of Points that you accumulate each year compared to working full time and cannot be caught up. (Refer to the section about Points.)

If you have worked part-time you will accumulate part of a contribution Point for each month, based on the percentage of time that you have worked part-time and whether you have contributed at your standard contribution rate or not.

Example

Andrew works part-time at 80% of full-time hours and is contributing at his standard contribution rate of 6% for one financial year. This means he will accrue 0.8 of a Point per month instead of 1 Point per month.

His total Points for the year will be:

$$12 \text{ months} \times 0.8 \text{ Points per month} = 9.6 \text{ Points for the year.}$$

This is the maximum number of Points Andrew can accumulate during his part-time employment and cannot be caught up to the full-time equivalent.

If you change your working hours after 31 March and before 30 June in any year and you or your employer notify Super SA of this change, your contributions will be adjusted accordingly from July.

If you change on or after 1 July and you are still working the revised hours on the following 31 March, your contributions will change accordingly from July in the following year.

Example

Rachel works part-time at 50% of full-time hours and is contributing at her standard contribution rate of 6%, meaning she accrues 0.5 of a Point each month.

On 2 July, Rachel begins working at 100% of full-time hours. Rachel will continue to accrue 0.5 of a Point per month until 1 July in the following year, at which time, provided she is still working 100% of full-time hours at 31 March in that year, the Points accruing will increase to 1 Point per month.

3. Having periods of membership when you do not contribute.

If you reduce your contribution rate to 0%, or cease contributions due to leave without pay (LWOP), you will not accrue any Points during this period. This is called Non-Contributory Membership and you cannot catch up the Points that you have missed.

The effect of periods of zero contribution

Reducing your contribution rate to 0% has an adverse effect on your entitlements. Additionally, if you die or become disabled during a period when you are not contributing, only your accrued entitlement will be paid. If you wish to change your contribution rate to 0%, you should contact Super SA for information about the implications on your current and future entitlements.

During periods of zero contribution you will become a member of Triple S, as the State Government is required to meet its Superannuation Guarantee (SG) obligations. The Employer Contribution will be paid into an Employer Account in Triple S on your behalf.

If you choose to make personal after-tax or salary sacrifice contributions into your Triple S account during a period of Non-Contributory Membership with the Lump Sum Scheme, your Lump Sum Scheme entitlement will be preserved and you will not be able to recommence active Lump Sum Scheme membership.

For more information on Triple S see the **Triple S Product Disclosure Statement**, available on the Super SA website.

Extrapolated Points on disablement and death

If you are a contributing member and become permanently disabled or die, you or your dependants will be entitled to an entitlement based on extrapolated Points.

What are Extrapolated Points?

To “extrapolate” means to estimate a future figure based on known data, assuming that the estimated figure follows logically from the known data.

In the case of working out your disablement or death entitlement, Extrapolated Points take into account your Accrued Points and then assume you would have continued accruing Points in the Scheme on the same basis as you were prior to your disablement or death. For a disablement entitlement your Extrapolated Points equal your Accrued Points plus the number of months from the date of the disablement to age 55. For a death entitlement before age 55, your Extrapolated Points equal your Accrued Points plus the number of months between the date of death and age 60. Extrapolated Points are adjusted for part-time service (if any).

General information about your Points

Remember:

- Accrued Points are the number of Points that you have actually accumulated
- Standard Points are the number of Points that you need to accumulate to be eligible for your maximum Employer Component.

If the information on your Annual Statement shows that your Accrued Points equal your Standard Points, then you are heading towards reaching your maximum Points and your maximum Employer Component on retirement.

If your Accrued Points are less than your Standard Points due to periods when you have contributed at less than your standard contribution rate, you can contribute at a higher level than your standard contribution rate to close the gap as described above. As long as your final Accrued Points are within one Point of your Standard Points, you will receive your full Employer Component.

As already explained, you cannot make up the Points you have lost through periods of part-time employment, periods of 0% contribution or LWOP.

If you have more Accrued Points than the required number of Standard Points, you can either continue to contribute at your current contribution rate or you can reduce your contribution rate. Your Employer Component will be calculated using your Standard Points, not your Accrued Points in this case.

2. Grow your super (continued)

You are able to track your Points on your Annual Statement to see your current position so that you remain eligible for your maximum achievable Employer Component.

If you want to know more about your Points contact Super SA on **1300 369 315**, or email **supersa@sa.gov.au**.

2.2 Salary sacrifice

Lump Sum Scheme members are able to make additional contributions to their super through salary sacrifice. Salary sacrifice means making contributions to your super from your before-tax, or gross salary. By sacrificing cash salary and directing it into your super, you may reduce the amount of income tax that you pay and increase your final super entitlement when you retire.

If you choose to salary sacrifice you will become a member of Triple S and your salary sacrifice contributions will be credited to Triple S. Your normal after-tax contributions will continue to be credited to the Lump Sum Scheme.

To find out more about Triple S, see the **Product Disclosure Statement (PDS)** on the Super SA website.

How to make salary sacrifice contributions

You can arrange to make contributions through your payroll office.

To contribute through your payroll office, download and complete a Salary Sacrifice for superannuation form, available to download from the Super SA website, or contact us to request one.

Costs

You will be charged Triple S fees and costs. See the Triple S PDS on the Super SA website for more information.

Investment options

Salary sacrifice contributions paid into Triple S are invested with Super SA's specialist funds manager, Funds SA. The same investment options are available through the Triple S and Lump Sum schemes. These are:

- High Growth
- Socially Responsible
- Balanced (default)
- Moderate
- Stable
- Capital Defensive
- Cash.

Funds SA develops investment strategies for each option. For further information please refer to the Investment of funds section.

Salary sacrifice facts

If you choose to make salary sacrifice contributions:

- Contributions are not considered part of your taxable income so your income tax may be reduced.
- Contributions are credited to an Employer Account in Triple S, and will be taxed when you withdraw them from the Scheme. In most circumstances, this means that they will be taxed at the concessional super rate. See the **Triple S Reference Guide** available on the Super SA website for more information.
- Contributions are preserved until you reach age 55 and resign from the SA public sector or reach age 65, unless you die or become permanently disabled.

- Your death and total and permanent disablement entitlements will continue to be provided through the Lump Sum Scheme. You can also purchase voluntary Death and Total and Permanent Disablement (TPD) Insurance through Triple S. For more information see the **Triple S Death and TPD, and Death Only** fact sheet.
- Salary sacrifice contributions do not reduce your income used in determining eligibility for the Government co-contribution or other Australian government benefits.
- Contributions to taxed funds will take into account contributions to untaxed funds when being assessed against the concessional cap for taxed funds.
- Currently there is no concessional contribution cap (applicable to employer and salary sacrifice contributions) for untaxed super schemes.

Please note that your Lump Sum Scheme entitlements are based on your full-time equivalent salary before any salary sacrifice contributions are deducted.

If you are already salary sacrificing through your employer and decide to stop, you need to complete a Salary Sacrifice for Superannuation form available on the Super SA website.

Maintaining your contributions to the Lump Sum Scheme

NOTE: It is important to note that any concessional contributions made to Lump Sum Scheme will be counted towards your concessional contributions cap where you also receive concessional contributions to a taxed super fund. Although you will not exceed your concessional cap as a result of concessional contributions made to Lump Sum Scheme, any additional concessional contributions made to a taxed fund may result in you exceeding the cap.

It is important to maintain your usual after-tax contributions to the Lump Sum Scheme if you choose to salary sacrifice. If you do not, your future super entitlement may be reduced. You may wish to contact Super SA for more information.

2.3 Additional after-tax lump sum contributions into Triple S

You are able to make additional after-tax lump sum contributions to your super if you already have a Triple S account.

A Triple S account will be established when you make salary sacrifice contributions or if you stop making after-tax contributions to the Lump Sum Scheme. You cannot establish a Triple S account by making a lump sum contribution.

There is a non-concessional contributions cap of \$120,000¹ each financial year on the amount of after-tax contributions you can make. If you are under age 75 you can bring forward the cap for two years to contribute up to \$360,000 in one year. It is important to note that the non-concessional contributions cap is \$0 if your total super balance is over \$2 million. Your Lump Sum Scheme member contributions will be counted towards the non-concessional contributions cap. If you go over these caps, you may be taxed at the highest marginal rate plus Medicare levy on the excess amount.

Payments received from the Australian Government as part of the co-contributions scheme do not count towards the contribution caps. Please visit **www.ato.gov.au** for more information.

¹ Between 1 July 2021 and 30 June 2030, you can re-contribute amounts withdrawn under a COVID-19 early release. These amounts won't count towards your non-concessional contributions cap, but you can only re-contribute up to the amount withdrawn and you cannot claim a tax deduction for re-contributed amounts. Please refer to the ATO website for more details and to obtain the required form.

3. Investment of funds

Your super is made up of an Employer Component and a Member Component. Some members may also have a PSESS entitlement, which forms part of their Employer Component.

The Employer Component is, in most cases, a guaranteed entitlement determined as a multiple of your final annual Entitlements Superannuation Salary (ESS), your length of time in the Scheme and the rates of contribution that you have elected to make.

The Member Component is made up of your Member Account (your member contributions plus investment earnings) and any Rollover Account (amounts you may have rolled into the Scheme from other super funds, plus investment earnings).

Your Member Component is subject to Investment Choice.

Contributions to your Member Component are invested by specialist investment manager, Funds SA.

3.1 Converting your super dollars into units

When funds go into your Member Account, or you roll in funds from another super fund, the money is used to purchase units.

The number of units purchased will depend on the value of the units on the date they're purchased. This value, or unit price, is generally determined twice weekly, in line with how your investment option is performing.

Therefore, the value of your Member Component depends on the current unit price.

Units represent a share of the underlying investments in the investment option of your choice and provide an efficient system for administering contributions and switching between the different investment options.

Your individual Member Account and any Rollover Account balances are calculated by multiplying the number of units you hold in each account by the prevailing unit price. A change in the unit price reflects changes in the value of the underlying investments.

Unit prices are posted on the Super SA website. While unit prices are generally determined twice weekly, investment options have been framed for investment time horizons of up to 10 years and beyond. It is important to keep this in mind when looking at returns over shorter periods.

3.2 Switching options

To switch your investment option, complete and sign the **Lump Sum Investment Choice** form available to download from the Super SA website, and return it to Super SA.

Please note that any change to your investment option may not be reflected in any quotes performed in the member portal on the Super SA website until Super SA confirms the completion of this change to you in writing.

Investment switches are generally processed twice weekly as follows:

Form received by:	Unit price applied:
5pm Monday	Unit price effective the following Thursday
5pm Thursday	Unit price effective the following Tuesday

These times may be varied for operational reasons, such as public holidays. Prior to variations members will be notified via the Super SA website.

The unit price applied to a switch will represent the market value of an investment option calculated after the published deadline for the receipt of Investment Choice forms.

Other things you need to know when you switch:

- If you switch from one investment option to another, the switch will be made at the next determined unit price. This could be higher or lower than the current unit price of both the option you're currently invested in and your new investment option
- As a Lump Sum Scheme member you can invest your funds in only one investment option
- There is no switch fee to change your investment option.

Rules relating to the suspension of unit prices

Where it is not possible to arrive at appropriate unit prices for a given day, or where the Super SA Board (or its delegate) ("Super SA") determines that there is a significant change in investment markets and the unit prices do not reflect the underlying values of the investment markets, Super SA may suspend unit pricing.

Where unit prices are suspended, all pending transactions will be suspended, and they will not be completed until Super SA determines to lift the suspension. The unit price applied to any suspended transactions will be the first unit price approved immediately after the suspension is lifted.

During the suspension period, Super SA may determine that some urgent transactions will be processed using the last available approved unit price.

3.3 Investment Choice – your investment options

As a Lump Sum Scheme member you can choose the investment option that best suits your individual needs for your Member Component.

There are several investment options available – High Growth, Socially Responsible, Balanced, Moderate, Stable, Capital Defensive and Cash.

If you do not choose an option, the balance of your Member Component will be invested in the Balanced option.

For a full description of all the options and their asset allocations please refer to the Investment options section.

3. Investment of funds (continued)

You should seek professional financial advice to ensure that your chosen investment is suited to your personal needs.

If you have a PSESS and/or SG Account, it is invested in the Defined Benefit High Growth option, which is the investment for employer funded entitlements. Investment choice is not available for your PSESS and/or SG Account because these form part of your Employer Component.

How your investments are managed

Strategies are developed for each option targeting the best balance of risk versus return.

Each option has its own:

- Objective. What does the option aim to achieve?
- Investment Time Horizon. What is the length of time needed to reach the earning potential of your investment?
- Risk. What is the relative risk involved in the option?
- Asset Class Mix. What mix of investments makes up the option?

When choosing the investment option right for you, consider:

- your current financial position
- your age
- your estimated time of retirement
- how long your super will need to last
- your attitude to accepting additional risk in seeking higher returns.

3.4 Risk of investments

Some important risks are:

- **Inflation.** Inflation may exceed the return you receive on your investment.
- **Market.** Economic, technological, political or legal conditions may affect the value of investments. Market sentiment may also alter the value.
- **Manager performance.** The risk that individual investment managers underperform.
- **Interest rates.** Changes in interest rates may also affect investment returns positively or negatively.
- **Foreign currency.** For overseas investments there is a risk that the value of other currencies may change in relation to the Australian dollar and reduce the value of the investment.
- **Derivatives.** Derivatives are financial contracts used in the management of investments whose value depends on the value of specific underlying investments. Their value can fluctuate, sometimes away from the expected value, and they are also subject to counterparty risk.
- **Counterparty risk.** Counterparty risk is the risk that an organisation contracted to provide an investment service is not able to do so. This may result in loss of value.

- **Underlying investments.** The value of each option's underlying investments can rise as well as fall.

Some of the most common influences on underlying investments include:

- **Australian shares:** individual shares are affected by factors affecting the share market generally but also by the profits and expected profits of individual companies.
- **International shares:** risks for international shares are similar to risks for Australian shares. Additionally, they are affected by political factors and the currency exchange rate of the country where the shares are held.
- **Property:** economic factors such as inflation and unemployment will affect the return on property, as well as the location and quality of the property itself.
- **Fixed interest investments:** changes in interest rates, as well as the risk of loan repayment default, will result in a change in value of this investment.

Other risks specific to super investments include changes to super laws or taxation laws, which may affect the accessibility or value of your investment.

3. Investment of funds (continued)

3.5 Asset classes

Each investment option is made up of asset classes. An asset class can be something tangible like property, or something intangible like shares or fixed interest.

The table below lists the six main types of asset classes and the different levels of risk and return of each.

Asset classes that make up the investment options				
Asset class	Description	Asset type	Risk	Return
Cash (e.g. Bank deposits, bank bills, term deposits and floating rate notes)	These are investments in assets that can be cashed in quickly. An investment suitable for investors with a low risk tolerance.	Defensive	Low	Low
Fixed Interest (e.g. Government bonds, corporate bonds and inflation linked securities)	These investments are usually in the form of loans to governments or companies who pay a fixed rate of interest for the term of the loan. Returns tend to be better than cash over the long term, but lower than property and shares. Inflation linked securities have the additional feature of being linked to a measure of the general level of prices in Australia, such as the Consumer Price Index (CPI).	Defensive	Low – Moderate	Low – Moderate
Credit (e.g. Corporate bonds)	Investments in debt securities that are issued by companies, emerging market governments, asset-backed and mortgage-backed structures.	Mixed	Moderate	Moderate
Alternatives (e.g. Financial derivatives and hedge funds)	Assets that don't fit into the other asset classes because they invest in a range of financial instruments.	Mixed	Moderate	Moderate
Property (e.g. Retail, commercial and industrial property)	These are investments in unlisted property trusts and shares in listed property trusts on the sharemarket. There's potential for these property assets to provide moderate returns over the long term, however the value of the assets can fluctuate and returns can be negative.	Mixed	Moderate	Moderate
Shares (equities) (e.g. A stake or financial interest in an Australian or international company)	These are investments in companies listed or about to be listed on the Australian or international stock exchanges. Dividends provide income although they can't be guaranteed. Share prices can fluctuate dramatically and can be frequently negative, which makes them high risk but there's potential for high capital growth over the long term.	Growth	High	High
Infrastructure (e.g. Airports, electricity and telecommunication networks)	These are investments in assets or companies which provide common essential services that are important to the functioning of society at large.	Mixed	High	High
Private Markets (e.g. A stake or financial interest in an Australian or international company, which isn't listed on a stock exchange.)	These are investments in assets such as private companies which are typically smaller than those listed on a stock exchanges but can have higher revenue/ earnings growth. Funds SA's investment managers typically have controlling stakes in these companies and will look to implement strategic or operational improvements at these companies in order to maximise the value of these investments.	Growth	High	High

Growth assets aim to achieve higher returns over the long term but also carry higher risk.
Defensive assets usually deliver lower returns over the long term but tend to carry less risk.
Mixed assets have both Growth and Defensive characteristics to varying degrees.

3. Investment of funds (continued)

3.6 Rates of return

Investment returns reflect the movements in the unit price over the periods shown.

Returns are reported net of investment management fees. Tax is not applicable to the investment returns of the Lump Sum Scheme as it is an untaxed scheme and therefore the returns for the Lump Sum Scheme are reported without taking tax into account. However, most other funds are “taxed funds” and their investment earnings are usually reported net of tax. Care must therefore be taken when comparing the performance of the Lump Sum Scheme to that of other funds to ensure that the impact of tax on investment returns is considered.

It is important to remember that past performance should not be taken as an indication of future performance.

Option	Periods to 30 June 2025			
	10 years % p.a.	5 years % p.a.	3 years % p.a.	1 year %
High Growth	8.27%	9.39%	10.20%	11.17%
Socially Responsible	6.77%	8.76%	9.98%	10.67%
Balanced	7.27%	8.23%	9.25%	9.87%
Moderate	5.93%	6.43%	8.07%	9.02%
Stable	4.74%	4.71%	6.77	8.06%
Capital Defensive	3.63%	3.27%	5.59%	7.39%
Cash	2.10%	2.43%	4.03%	4.64%
Defined Benefit High Growth ²	7.88%	8.89%	8.02%	9.26%

Expected range of return outcomes for the Lump Sum Scheme investment options

For each investment option there is an expected range of annual returns. This varies between the options.

The expected range of annual returns³ for the investment options are shown in the below graph.

Generally, the options that offer the highest potential long-term returns also come with the widest range of returns including the possibility of negative returns. Options that offer the lowest potential long-term returns come with the narrowest range of returns and greatest likelihood of positive returns.

Next steps

To keep track of how your option is doing, you can check its investment performance on the Super SA website.

² Option introduced 1 January 2017, past returns include previous Defined Benefit Growth option performance.

³ For the 2025-26 financial year. There is approximately a 5% chance that the return in any given year could lie outside of this range.

4. Investment options

High Growth		
This option is structured for investors with an investment time horizon of at least 10 years. Annual returns may be volatile.		
Investment return objective ⁴	CPI + 4.0%*	
Asset allocation		
This option is invested in the range of 70 - 100% in growth assets (shares, certain types of property, private equity and other growth opportunities) and the balance in defensive assets (such as cash and fixed interest).		
Asset class	Strategic Asset Allocation % ⁵	Range %
Australian Equities	28	10-40
International Equities	41	20-55
Private Markets	7	0-20
Property	6	0-30
Infrastructure	6	0-20
Alternatives	2	0-10
Credit	8	0-20
Fixed Interest	0	0-20
Cash	2	0-20
Min suggested time frame	10 years	
Summary risk level ⁶	It is likely that a negative return might be expected to occur between four and six years in 20.	
Risk classification	High risk (Risk Band 6) ⁶	

*Effective 29 January 2026, up to 28 January 2026 target rate of return CPI + 4.5%

Socially Responsible		
In this option, underlying investment managers actively incorporate the consideration of environmental, social and governance factors in their investment decisions and also avoid companies operating in areas of high negative social impact. This option is structured for investors with an investment time horizon of at least 10 years. Annual returns may be volatile.		
Investment return objective ⁷	CPI + 3.0%	
Asset allocation		
This option is invested in the range of 57-87% in growth assets (shares, certain types of property, private equity and other growth opportunities) and the balance in defensive assets (such as cash and fixed interest).		
Asset class	Strategic Asset Allocation % ⁵	Range %
Australian Equities	26	15-40
International Equities	30	20-45
Private Markets	5	0-15
Property	6	0-25
Infrastructure	9	0-20
Credit	9	0-15
Fixed Interest	12	0-40
Cash	3	0-20
Min suggested time frame	10 years	
Summary risk level ⁶	It is likely that a negative return might be expected to occur between three and four years in 20.	
Risk classification	Medium to high risk (Risk Band 5) ⁶	

⁴ The investment objectives state what each option aims to achieve and are designed to help investors with their investment decisions. The objectives have been developed having regard for the long term performance and characteristics of financial markets and taking into account expert advice provided by specialist investment advisor JANA. There is no guarantee, however that the objectives will be met. This is because financial markets are volatile and future returns may vary from returns earned in the past. Indeed, for funds with exposure to growth assets there is a material likelihood that returns may be negative in any particular year.

⁵ Long-Term Strategic Asset Allocation (LTSA).

⁶ See Glossary of terms for more information about the Standard Risk Measure.

⁷ The use of socially responsible investment criteria in the construction of an investment portfolio may not necessarily result in higher investment returns, as particular opportunities are excluded by the responsible investment process.

4. Investment options (continued)

Balanced		
This option is structured for investors with an investment time horizon of at least 10 years. Annual returns may be volatile.		
Investment return objective ⁴	CPI + 3.5%	
Asset allocation		
This option is invested in the range of 60-90% in growth assets (shares, certain types of property, private equity and other growth opportunities) and the balance in defensive assets (such as cash and fixed interest).		
Asset class	Strategic Asset Allocation % ⁵	Range %
Australian Equities	22	10-40
International Equities	33	20-45
Private Markets	5.5	0-15
Property	6	0-25
Infrastructure	9	0-20
Alternatives	2.5	0-15
Credit	9	0-20
Fixed Interest	9	0-35
Cash	4	0-20
Min suggested time frame	10 years	
Summary risk level ⁶	It is likely that a negative return might be expected to occur between three and four years in 20.	
Risk classification	Medium to high risk (Risk Band 5) ⁶	

Moderate		
This option is structured for investors with an investment time horizon of at least six years. Annual returns may be volatile.		
Investment return objective ⁴	CPI + 2.5%	
Asset allocation		
This option is invested in the range of 40 - 70% in growth assets (shares, certain types of property, private equity and other growth opportunities) and the balance in defensive assets (such as cash and fixed interest).		
Asset class	Strategic Asset Allocation % ⁵	Range %
Australian Equities	16	5-30
International Equities	24	10-35
Private Markets	3	0-15
Property	5	0-20
Infrastructure	10	0-20
Alternatives	1.5	0-15
Credit	13	0-20
Fixed Interest	17.5	0-45
Cash	10	0-20
Min suggested time frame	6 years	
Summary risk level ⁶	It is likely that a negative return might be expected to occur between two and three years years in 20.	
Risk classification	Medium risk (Risk Band 4) ⁶	

⁴ The investment objectives state what each option aims to achieve and are designed to help investors with their investment decisions. The objectives have been developed having regard for the long term performance and characteristics of financial markets and taking into account expert advice provided by specialist investment advisor JANA. There is no guarantee, however that the objectives will be met. This is because financial markets are volatile and future returns may vary from returns earned in the past. Indeed, for funds with exposure to growth assets there is a material likelihood that returns may be negative in any particular year.

⁵ Long-Term Strategic Asset Allocation (LTSAA).

⁶ See Glossary of terms for more information about the Standard Risk Measure.

4. Investment options (continued)

Stable		
This option is structured for investors with an investment time horizon of at least four years. Annual returns may be volatile.		
Investment return objective ⁴	CPI + 1.5%	
Asset allocation		
This option is invested in the range of 25 - 55% in growth assets (shares and certain types of property) and the balance in defensive assets (such as cash and fixed interest).		
Asset class	Strategic Asset Allocation % ⁵	Range %
Australian Equities	9	0-20
International Equities	15	5-25
Private Markets	2.5	0-15
Property	5	0-20
Infrastructure	12	0-20
Alternatives	1	0-15
Credit	13	0-20
Fixed Interest	28.5	10-55
Cash	14	0-25
Min suggested time frame	4 years	
Summary risk level ⁶	It is likely that a negative return might be expected to occur between one and two years in 20.	
Risk classification	Low to medium risk (Risk Band 3) ⁶	

Capital Defensive		
This option is structured for investors with an investment time horizon of at least two years. Annual returns may be volatile.		
Investment return objective ⁴	CPI + 0.5%	
Asset allocation		
This option is invested in the range of 10 - 40% in growth assets (shares and certain types of property) and the balance in defensive assets (such as cash and fixed interest).		
Asset class	Strategic Asset Allocation % ⁵	Range %
Australian Equities	5	0-15
International Equities	7	0-20
Private Markets	1.5	0-15
Property	4	0-20
Infrastructure	13	0-25
Alternatives	0	0-15
Credit	15.5	5-30
Fixed Interest	36	15-60
Cash	18	0-30
Min suggested time frame	2 years	
Summary risk level ⁶	It is likely that a negative return might be expected to occur between 0.5 and 1 year in 20.	
Risk classification	Low risk (Risk Band 2) ⁶	

⁴ The investment objectives state what each option aims to achieve and are designed to help investors with their investment decisions. The objectives have been developed having regard for the long term performance and characteristics of financial markets and taking into account expert advice provided by specialist investment advisor JANA. There is no guarantee, however that the objectives will be met. This is because financial markets are volatile and future returns may vary from returns earned in the past. Indeed, for funds with exposure to growth assets there is a material likelihood that returns may be negative in any particular year.

⁵ Long-Term Strategic Asset Allocation (LTSA).

⁶ See Glossary of terms for more information about the Standard Risk Measure.

4. Investment options (continued)

Cash	
A stable investment for investors with a low risk tolerance.	
Investment return objective⁴	RBA cash rate
Asset allocation	
This option is invested in 100% Cash.	
Asset class	Strategic Asset Allocation %⁵
Cash	100
Min suggested time frame	0 years
Summary risk level⁶	It is likely that a negative return might be expected to occur less than 0.5 years in 20.
Risk classification	Very low risk (Risk Band 1) ⁶

Defined Benefit High Growth (Employer component only) ⁸		
This option is structured for investors with an investment time horizon of at least 10 years. Annual returns may be volatile.		
Investment return objective ⁴	CPI + 4.5%	
Asset allocation		
This option is invested in the range of 70 – 100% in growth assets (shares, certain types of property, private equity and other growth opportunities) and the balance in defensive assets (such as cash and fixed interest).		
Asset class	Strategic Asset Allocation % ⁵	Range %
Australian Equities	20	10-30
International Equities	30	20-40
Private Markets	10	0-20
Property	8	0-18
Infrastructure	8	0-18
Alternatives	8	0-18
Credit	14	4-24
Cash	2	0-20
Min suggested time frame		10 years
Summary risk level ⁶		It is likely that a negative return might occur between three and four years in 20.
Risk classification		Medium to high risk (Risk Band 5) ⁶

⁴ The investment objectives state what each option aims to achieve and are designed to help investors with their investment decisions. The objectives have been developed having regard for the long term performance and characteristics of financial markets and taking into account expert advice provided by specialist investment advisor JANA. There is no guarantee, however that the objectives will be met. This is because financial markets are volatile and future returns may vary from returns earned in the past. Indeed, for funds with exposure to growth assets there is a material likelihood that returns may be negative in any particular year.

⁵ Long-Term Strategic Asset Allocation (LTSA).

⁶ See Glossary of terms for more information about the Standard Risk Measure.

⁸ This option is only relevant to your employer component. Members with a PSESS and/or SG Account have this component invested in the Defined Benefit High Growth option, which cannot be changed. The investment objectives state what each option aims to achieve and are designed to help investors with their investment decisions. The objectives have been developed having regard for the long term performance and characteristics of financial markets and taking into account expert advice provided by specialist investment advisor JANA. There is no guarantee, however that the objectives will be met. This is because financial markets are volatile and future returns may vary from returns earned in the past. Indeed, for funds with exposure to growth assets there is a material likelihood that returns may be negative in any particular year.

4. Investment options (continued)

Responsible Investing

At Super SA, we understand our members may be interested in how their superannuation is invested and how those investments impact our broader community. Funds SA, as the investment manager, determines the approach to responsible investing to support long-term investment outcomes.

Funds SA defines responsible investment as a financial outcomes-focused approach that complements traditional investment analysis through consideration of Environmental, Social (including labour standards), and Governance (ESG) factors in investment analysis and investment Stewardship. Funds SA is a signatory to the UN-supported Principles for Responsible Investment (PRI). PRI signatories undertake to consider ESG factors in their investment decision-making and ownership practices.

Funds SA takes ESG factors into account using the following approaches:

- **ESG Integration** – the process of considering ESG issues and opportunities in investment analysis and decision making. The materiality of an ESG issue is determined by the potential impact of the issue on investment returns. Funds SA implements this by considering ESG factors before investments are made and during ongoing monitoring activities. This includes an assessment of the ESG processes of external investment managers as well as analysis of the ESG issues within investment opportunities across broad themes, like climate change.
- **Investment Stewardship** - the responsible oversight and management of investments, including through proxy voting, engagements, and class actions. Funds SA directly exercises the voting rights of certain Australian securities, engages with external investment managers and companies, and has a class actions program.
- **Labour standards, ESG and ethical considerations** form part of Funds SA's investment activities and day-to-day operations in accordance with Funds SA's Responsible Investment Policy and Conflicts Management Framework as well as the Code of Ethics for the South Australian public sector. Funds SA's external investment managers have differing ESG approaches. Funds SA assesses the ESG processes for each external investment manager on an ongoing basis. Remedial action or divestment may be taken where an external investment manager's approach is inconsistent with Funds SA's responsible investment approach, on a case-by-case basis. There is no single methodology adopted for taking ethical considerations into account in investment activities.

The above approach applies to all investment options. Additional factors are taken into account in the Socially Responsible investment option.

For more information about Funds SA's Responsible Investment process, please refer to the Responsible Investing section on the Super SA website.

Socially Responsible Investment Option

Super SA offers a Socially Responsible (SR) investment option that provides our members with access to a portfolio that targets investments that contribute to the betterment of society and at the same time, where possible, avoiding investments that have the potential to cause or contribute to social harm. This means targeting investments such as education, healthcare, and climate change solutions while avoiding such as tobacco, alcohol, gambling, fossil fuels, weapons, nuclear power, and adult entertainment.

The SR investment option invests in line with socially responsible investment criteria established by Funds SA. This includes a combination of:

- implementing investment exclusions
- targeting socially responsible investments
- inclusion of a 'best-in-class' ESG approach.

The particular SR Criteria that Funds SA sets varies between asset classes and investment managers. There will also be times where the SR investment option invests in pooled funds alongside other investors where Funds SA cannot prescribe the SR Criteria. In these cases, the aim is to select funds that remain consistent with the purpose of the SR option.

Investment exclusions

The SR investment option seeks to avoid companies that have the potential to cause or contribute to social harm. The option excludes certain industries or companies that engage in certain business activities from its universe of possible investments.

Revenue and product involvement (i.e., manufacturing, supply, and distribution) thresholds apply in some cases so that companies with multiple business activities are not excluded for very low involvement. However, Funds SA maintains low revenue thresholds so these activities can generally be avoided. The investment exclusions do not apply to derivatives and exchange-traded funds that may have an indirect exposure to these types of companies.

The investment exclusions applied to the Australian and International Listed Equities portfolios in the SR investment option only include:

Tobacco

All companies classified as a producer of tobacco products.

All companies deriving 5% or more aggregate revenue from production, distribution, retail, supply (and licensing in International equities) of tobacco-related products.

Alcohol

In Australian equities, all companies classified as a "Producer". All companies deriving 5% or more aggregate revenue from the production, distribution, retail and supply of alcohol-related products.

In International equities, all companies deriving 5% or more revenue from the production of alcohol-related products. All companies deriving 15% or more aggregate revenue from the production, distribution, retail and supply of alcohol-related products.

Controversial Weapons

All companies with any tie to Controversial Weapons (cluster munitions, landmines, depleted uranium weapons, biological/chemical weapons, blinding lasers, nondetectable fragments and incendiary weapons), as defined by the methodology of the MSCI Global Ex-Controversial Weapons Indexes available at www.msci.com/index-methodology.

Conventional Weapons

All companies deriving 5% or more revenue from the production of conventional weapons (and components in International equities). All companies deriving 15% or more aggregate revenue from weapons systems, components, and support systems and services.

4. Investment options (continued)

Civilian Firearms

All companies classified as a “Producer” of firearms and small arms ammunitions for civilian markets. The exclusion does not include companies that cater to the military, government, and law enforcement markets.

In Australian equities, all companies deriving 5% or more revenue from the distribution (wholesale or retail) of firearms or small arms ammunition intended for civilian use. In International equities, all companies deriving 5% or more aggregate revenue from the production and distribution (wholesale or retail) of firearms or small arms ammunition intended for civilian use.

Nuclear Weapons

All companies that manufacture nuclear warheads and/or whole nuclear missiles. All companies that manufacture components that were developed or are significantly modified for exclusive use in nuclear weapons (warheads and missiles).

All companies that manufacture or assemble delivery platforms that were developed or significantly modified for the exclusive delivery of nuclear weapons. All companies that provide auxiliary services related to nuclear weapons. All companies that manufacture components that were not developed or not significantly modified for exclusive use in nuclear weapons (warheads and missiles) but can be used in nuclear weapons. All companies that manufacture or assemble delivery platforms that were not developed or not significantly modified for the exclusive delivery of nuclear weapons but have the capability to deliver nuclear weapons. All companies that manufacture components for nuclear-exclusive delivery platforms.

Adult Entertainment

All companies deriving 5% or more revenue from the production of adult entertainment materials. All companies deriving 15% or more aggregate revenue from the production, distribution and retail of adult entertainment materials.

Gambling

All companies deriving 5% or more revenue from ownership or operation of gambling-related business activities.

All companies deriving 15% or more aggregate revenue from gambling-related business activities.

Nuclear Power

All companies generating 5% or more of their total electricity from nuclear power in a given year. All companies that have 5% or more of installed capacity attributed to nuclear sources in a given fiscal year. All companies deriving 15% or more aggregate revenue from nuclear power activities.

Additionally, for Australian equities, all companies that have any tie to the nuclear power industry

Fossil Fuels

Australian equities:

All companies excluded by the application of the MSCI Global ex Fossil Fuels Indexes methodology. All companies with evidence of owning fossil fuel reserves regardless of their industry, including companies that own less than 50% of a reserves field. All companies that derive a part of their revenue (either reported or estimated), from oil and gas related activities, including distribution / retail, equipment and services, extraction and production, petrochemicals, pipelines and transportation and refining but excluding biofuel production and sales and trading activities.

All companies that derive a part of their revenue (either reported or estimated) from the mining of thermal coal (including lignite, bituminous, anthracite and steam coal) and its sale to external parties.

International equities:

All companies with evidence of owning proven & probable coal reserves and/or proven oil and natural gas reserves used for energy purposes, as defined by the methodology of the MSCI Global Ex Fossil Fuels Indexes available at www.msci.com/index-methodology. All companies deriving any revenue (either reported or estimated) from thermal coal mining or unconventional oil and gas extraction. Thermal Coal Mining: Revenue from the mining of thermal coal (including lignite, bituminous, anthracite and steam coal) and its sale to external parties. It does not cover revenue from metallurgical coal; coal mined for internal power generation (e.g. in the case of vertically integrated power producers); intra-company sales of mined thermal coal; and revenue from coal trading. Unconventional Oil & Gas Extraction: Revenue from oil sands, oil shale (kerogen-rich deposits), shale gas, shale oil, coal seam gas, and coal bed methane. It does not cover all types of conventional oil and gas production including Arctic onshore/offshore, deep water, shallow water and other onshore/offshore. All companies deriving 5% or more revenue (either reported or estimated) from thermal coal-based power generation.

Animal Welfare

Australian equities only:

All companies that are involved in commercial animal husbandry for the purpose of food production, including breeding, raising, and slaughtering pork, veal, poultry, and beef, as well as dairy and egg farm operators. All companies that conduct animal testing for non-pharmaceutical products such as cosmetic, personal care, and household cleaning products.

Controversies Scores are used to identify those companies that are involved in serious and very serious controversies involving the environmental, social, or governance impact of their operations and/or products and services.

In Australian equities, companies are required to have an MSCI ESG Controversies Score of 2 or above to be eligible for inclusion (see our Best in Class approach for more information). Companies that are assessed as being involved in human rights controversies (those with a score less than 5) by the MSCI ESG Controversies score concerning the following key performance issues are excluded:

- Human Rights Abuses
- Support for Controversial Regimes
- Freedom of Expression & Censorship
- Impact on Local Communities

In International equities, companies are required to have an MSCI ESG Controversies Score of 4 or above to be eligible for inclusion.

Funds SA may divest from other sectors, industries or particular investments, without prior notice. For a summary of up-to-date exclusions, please refer to the Socially Responsible investment option section on the Super SA website.

4. Investment options (continued)

Targeting socially responsible investments

In addition to avoiding companies operating in areas of negative social impact, the SR investment option is focused on investments that contribute to solving large issues such as climate change, healthcare, education, and the provision of community and social infrastructure. Whilst Funds SA has not adopted a formal scale for measuring the social contribution of these assets, it aligns investments with generally recognised socially responsible investing and ESG principles determined through its membership of industry bodies including the United Nations-supported PRI and other sources. Some examples of the types of investments that Funds SA targets in the SR option are:

- Infrastructure investments that support key community and social needs as well as renewable energy. This includes schools, TAFE, hospitals, correctional facilities, water treatment plants, and other social infrastructure sectors as well as wind and solar farms.
- Private Equity investments that are focused on businesses that generate a clear and measurable positive social and/or environmental impact across one or more of the following key impact themes: climate action, inclusive growth, and healthcare. This includes businesses providing healthcare for Inclusion of a best-in-class Environmental, Social, and Governance (ESG) approach.

Inclusion of a best-in-class Environmental, Social, and Governance (ESG) approach

The SR investment option takes a best-in-class ESG approach in the selection of its investment managers and its investments. Funds SA identifies investment managers that have deep expertise in understanding ESG criteria and can demonstrate its application into investment decisions. Funds SA surveys the ESG practices of its Investment Managers when completing initial due diligence and on an ongoing periodic basis to ensure that ESG processes are being maintained, as well as incorporating ESG considerations into routine monitoring activities.

Within the SR investment option's listed equities portfolio, the best in-class ESG approach means prioritising investment in companies that are at the top of their sector according to external ESG ratings provided by MSCI ESG Ratings LLC. The ESG ratings are on a 7-point scale from 'AAA' (leader) to 'CCC' (laggard). Companies are required to have an MSCI ESG Rating of 'A' or above to be added to the listed equities portfolio. For International listed equities, companies are required to have a score of at least 'BB' to remain in the portfolio.

For more information about how the socially responsible investment criteria is applied to each asset class, please refer to the Socially Responsible investment option section on the Super SA website.

5. Member entitlements

The Lump Sum Scheme provides a wide range of entitlements, depending on the circumstances under which you leave the SA public sector.

These are:

- Retirement
- Resignation
- Resignation, where you receive a Targeted Voluntary Separation Package
- Retrenchment
- Permanent disablement
- Death
- Transition to Retirement.

An entitlement is also payable upon temporary disablement.

Please note that any balances that you may have in a PSESS or Rollover Account will be payable in addition to the entitlements explained in this section.

How your entitlements are calculated

The technical calculations underlying your entitlements are complex. See table on this page.

Your Entitlements Superannuation Salary (ESS) is used to work out the Employer Component of your entitlement. This is your full-time equivalent annual salary at the date you ceased SA public sector employment. While you only pay member contributions based on your substantive salary, if you have been in receipt of a higher duties allowance continuously for 12 months or more at the date you ceased employment, your ESS will be based on the higher salary.

How to claim an entitlement

To receive any of your entitlements you, or your spouse or legal representative in the case of your death, will need to complete the appropriate application form.

This can be downloaded from the Super SA website or Super SA can post a copy to you on request.

Proof of identity

Under the *Anti-Money Laundering and Counter Terrorism Financing Act 2006*, superannuation funds are required to identify, monitor and mitigate the risk that the Scheme may be used for the laundering of money or the financing of terrorism. Because of this, you or your representative (if applicable) will be required to provide proof of identity when applying for the payment of a cash entitlement.

Super SA must be able to verify your name and **either** your date of birth or residential address from:

- an original document or
- a certified copy or
- a certified extract from an original document.

The source documents may be either:

- a primary photographic identification document or
- both a primary non-photographic identification document and a secondary identification document.

The documents must be valid and not have expired. The only exception to this is an Australian passport, providing it expired less than two years ago.

For more information on providing identification documents to Super SA, please see the **Proof of Identity** information sheet available to download from the Super SA website.

Changing employment with the SA public sector

If you retire or resign from your current position within the SA public sector and take up another SA public sector position within one month, your membership of the Lump Sum Scheme will continue and your entitlement will not be payable.

The table below shows how your full-time entitlement grows over time:

Employer Component as a multiple of ESS for members joining after 30 June 1992			
Years of membership paying 6%	(1) Employer component	(2) Additional award component	(3) (i.e. 1+2) Total employer component
10	1.29	0.34	1.63
15	1.93	0.51	2.44
20	2.57	0.68	3.25
25	3.21	0.85	4.06
30	3.86	1.02	4.88
35	4.50	1.19	5.69

5. Member entitlements (continued)

5.1 Retirement

If you retire at, or after, age 55 you will receive a lump sum equal to the balance of your Member Account, Rollover Account (if any) and PSESS Account (if any) as shown on your Annual Statement plus a defined Employer Component.

Your maximum entitlement

If you joined the Scheme after 30 June 1992, work full-time and average 6% member contributions for 35 years, your Employer Component will be:

4.5 times ESS PLUS an additional award component of $35 \times 3.4\% = 1.19$ times ESS.

This makes a total of 5.69 times ESS. The table on the preceding page shows how your Employer Component grows over time. The award component is adjusted for any periods of part-time employment.

In addition to the entitlement explained on this page, you will also receive the balance of your Member Account, Rollover Account (if any) and PSESS Account (if any).

You may wish to consider purchasing Super SA's post-retirement products, the Super SA Flexible Rollover Product and the Super SA Income Stream with your lump sum. See section 6 for further information.

Fixed term appointments

If you are on a fixed term appointment (including a Curriculum Guarantee position), you should refer to the **Contracts or acting arrangements of 12+ months** fact sheet for more information on your retirement entitlements, available on the Super SA website.

Will you have enough?

You can work out what your final entitlement might be by doing a benefit quote in the member portal on the Super SA website.

You can perform a range of quotes, including retirement, resignation or death or total and permanent disablement at various ages, with all the calculations done for you.

If you are considering reducing your working hours between now and retirement, you can also see the effect that this is likely to have on your final entitlement.

To access the benefit quote, go to Super SA member portal:

1. Click on Register (if you haven't used this before) or Sign In. You will need your Super ID, which is printed on your Annual Statement
2. Click on Benefit Details
3. Click on Benefit Quote
4. Read and Accept the disclaimer.

Please note the login for the Lump Sum Scheme is different to any other accounts you might have with Super SA. You can then use the quote function to enter any future changes in your working hours to see the effect this may have. You will need to enter a projected year of retirement, the fraction of full-time hours you intend to work (e.g. 0.8 or 0.6) and the date when you are likely to commence your part-time work. Click the Next button to complete your calculation.

Tip: Do an initial calculation without changing your hours and then repeat with your intended part-time hours, so that you can compare how much your final lump sum varies with your changed hours.

5. Member entitlements (continued)

5.2 Resignation

If you resign from the SA public sector before the age of 55 you can choose one of three options.

The amount of your lump sum may vary according to which option you choose.

The options are:

- cashing part of your entitlement and preserving the balance
- preserving your accrued lump sum entitlement in the Scheme
- rolling over a fully preserved entitlement into the Super SA Flexible Rollover Product (see section 6 for more information) or another complying super fund.

If you resign from the SA public sector after age 55 your options are as for retirement, described in Section 5.1.

1. Cashing part of your lump sum entitlement

If you resign before reaching age 55, you can immediately access the non-preserved components of your entitlement.

If you do this you will effectively lose part of your Employer Component, according to Scheme rules. Your Employer Component, equal to the Australian Government Superannuation Guarantee (SG), due to you from 1 July 1992, will be automatically preserved in the Scheme, or you can roll it over to another complying super fund.

The non-preserved components of your entitlement are:

- the balance of your Member Account
- the non-preserved part of your Rollover Account (if any).

You must apply within three months of leaving the SA public sector to claim your non-preserved components before age 55, or your accrued entitlement will remain preserved in the Scheme until you reach age 55. However, an entitlement can be rolled over to a complying super fund at any time.

You cannot access the preserved components of your entitlement, which are:

- your Employer Component (SG)
- the balance of your PSESS Account (if any)
- the preserved part of your Rollover Account (if any).

Your Employer Component and any PSESS Account will become available at age 55. Any part of your Rollover Account that is preserved will be subject to Australian Government preservation rules (see Glossary). Your account balance(s) will continue to vary with investment earnings.

You can roll the preserved components of your entitlement into a complying super fund, where they will be subject to Australian Government preservation rules.

The preserved components may be paid earlier if you become totally and permanently disabled or die.

2. Preserving an accrued lump sum entitlement in the Lump Sum Scheme

If you resign, you can preserve your accrued entitlement until your retirement on or after age 55.

Your preserved accrued entitlement consists of:

- the balance of your Member Account
- the balance of your Rollover Account (if any, subject to preservation rules)
- an Employer Component, which is a multiple of your ESS. The multiple is based on:
 - your length of contributory membership in the Scheme
 - your elected contribution rate
 - your proportion of full-time employment
- the balance of your PSESS Account (if any).

You can claim your preserved accrued entitlement any time between the ages of 55 and 65, however it can only be claimed before the age of 55 if you suffer total and permanent disablement or die.

If you have preserved an accrued entitlement before age 55, you can roll an entitlement into a complying super fund at any time, where it will be subject to Australian Government preservation rules.

Your ESS is indexed by the CPI, between the date of resignation and the date of payment of the entitlement. The award component (see section 5) is adjusted for any periods of part-time service.

The remaining components of your account balance(s) will continue to vary with investment earnings.

3. Rolling over an entitlement which is fully preserved

If you choose to roll over a fully preserved entitlement before age 55 it will consist of:

- the balance of your Member Account
- the balance of your Rollover Account (if any, subject to preservation rules)
- an Employer Component that is:
 - the lesser of twice the balance of your Member Account or your Notional Member Account plus
 - an award component adjusted for any periods of part-time service
- the balance of your PSESS Account (if any).

Your Notional Member Account is the amount you would have accrued had you contributed at the rate of 6% throughout your contributory membership.

If you choose to roll over a fully preserved entitlement, it will remain preserved in the new fund and will be subject to Australian Government preservation rules (see Section 11 - Glossary).

5.3 Targeted Voluntary Separation Package (TVSP)

If you are offered a TVSP, please refer to the **Targeted Voluntary Separation Packages** information sheet available to download from the Super SA website at supersa.sa.gov.au, for detailed information about your options.

5. Member entitlements (continued)

5.4 Retrenchment

If you are retrenched from the SA public sector before the age of 55, your employer must satisfy the Super SA Board that there is no other position, for which you are qualified and suited, available to you before you can receive a retrenchment entitlement.

Once the Super SA Board has been satisfied, you have three months to claim your entitlement. If you do not claim it in three months, it will be taken that you have chosen to preserve your accrued lump sum entitlement.

The retrenchment entitlement consists of:

- the balance of your Member Account
- the balance of your Rollover Account (if any, subject to the preservation rules)
- an Employer Component that is:
 - the lesser of twice the balance of your Member Account or your Notional Member Account plus
 - an award component adjusted for any periods of part-time service
 - the balance of your PSESS Account (if any).

You can choose to do one of the following with your retrenchment entitlement:

- take the full entitlement as a cash payment
- roll over part of the entitlement into a complying super fund, where it will become subject to Australian Government preservation rules, and take the balance as a cash payment
- roll over the full entitlement into a complying super fund, where it will become subject to Australian Government preservation rules.

5.5 Temporary disablement entitlements (income protection)

If you are under age 55 and unable to work due to illness or injury, you may qualify for a temporary fortnightly pension for a period of up to 12 months, and up to 18 months in certain circumstances. Application forms and eligibility criteria are available from Super SA upon request.

The Super SA Board must approve the payment of a temporary disablement pension.

To receive a temporary disablement pension you must have exhausted all your sick leave entitlements, however you are not required to use any of your annual leave or long service leave entitlements.

The pension is equal to two-thirds of your current salary. If you are employed part-time at the time of claiming your temporary disablement entitlements your pension is proportionally reduced to reflect any periods of part-time employment you may have had during the three years prior to making your claim.

If you are receiving, or are entitled to receive, regular workers compensation payments, no temporary disablement pension is payable.

You are not required to make after-tax contributions whilst in receipt of a temporary disablement pension, however, your Employer Component will continue to grow as if you were.

For more information see the Temporary Disablement Entitlement fact sheet available on the Super SA website.

5.6 Permanent disablement entitlements

The Lump Sum Scheme provides an entitlement for retirement on the grounds of total and permanent disablement before age 55.

The entitlement to a total and permanent disablement payment is subject to Super SA Board approval.

You should therefore not resign or accept termination on account of disablement without first getting written approval from the Super SA Board.

Use the Benefit Projector in the member portal on the Super SA website to find out what you might be entitled to receive if you become totally and permanently disabled.

If you are receiving, or are entitled to receive, regular workers compensation payments in respect of total and permanent disablement, the Employer Component of the disablement lump sum is based on actual contributory membership only.

In the event of total and permanent disablement after age 55, a normal retirement entitlement is paid (refer 5.1).

5.7 Death entitlements

This entitlement is payable to your spouse/putative spouse⁹ and eligible children (if any), or where there is no surviving spouse/putative spouse, to your Estate and eligible children (if any).

If you die before age 55, the entitlement is reduced if your spouse is receiving, or is entitled to receive, workers compensation payments in relation to your death.

Spouse/putative spouse and eligible children

If you die leaving a spouse and/or a putative spouse, the amount they receive is worked out using "Extrapolated Points"⁹ with a maximum of 420 (35 years). These are proportionally reduced for any periods of part-time employment. If you are a non-contributory member, the amount will be paid based on Accrued Points and accrued months of contributory membership after 30 June 1992 to the date of death.

In addition to the amount received by your spouse/putative spouse, any eligible child/student⁹ will each receive a pension of up to a maximum of 5% of your Entitlements Superannuation Salary (ESS)⁹. If there are more than three children/students, a maximum 15% of ESS is divided among them. Pensions will be adjusted twice yearly according to the Consumer Price Index (CPI), all groups index for Adelaide.

This pension is payable until the child/children reach the age of 16, and will continue **as long as the child/children are full-time students** up to the age of 25, when it ceases.

Estate and orphans/eligible children (no spouse/putative spouse but eligible children)

If you have no spouse, but eligible children, your Estate will receive a lump sum. In addition, any eligible child/student⁹ will each receive a pension, as described above, of up to a maximum of 15% of ESS. If there are more than three children/students, a maximum of 45% of ESS is divided among them. Pensions will be adjusted twice yearly according to the CPI, all groups index for Adelaide.

⁹ See Glossary of terms for definitions

5. Member entitlements (continued)

Limitation of entitlements

When you applied for membership of the Lump Sum Scheme you were required to provide personal and medical information. The Super SA Board's medical consultants used this information to assess whether there was a risk of premature death.

If such a risk was evident, the Board may have accepted your application for membership subject to a limitation of entitlements should your employment cease due to the disclosed medical condition(s).

If a limitation was placed on your entitlements when you applied for membership, the Board would have advised you in writing of the nature of the limitation and the circumstances in which it would apply.

Should the cause of death or incapacity be unrelated to the disclosed medical conditions, normal entitlements will apply.

You may apply in writing to the Board to revoke any limitation of entitlements if you are able to produce appropriate medical evidence to satisfy the Board that the risk of premature death no longer exists.

5.8 Leave without pay and your entitlements

If you are taking more than two weeks Leave Without Pay (LWOP) you need to contact Super SA to discuss your options. If you take less than two weeks LWOP your employer will continue to deduct your member contributions, so you do not need to contact Super SA in this circumstance.

If you continue to make member contributions during your LWOP, your employer will also continue to make contributions. This will ensure that the Employer Component of your entitlement keeps on growing.

You will also maintain your Death and Total and Permanent Disablement entitlements as if you were receiving your regular salary.

Please note that in the majority of cases you can only contribute for up to 12 months while on LWOP.

Members who are taking LWOP for periods of more than 12 months can seek approval from the Super SA Board to maintain their member contributions if they are:

- participating in an overseas aid program, or
- seconded to another employer, and the new employer meets the cost of employer contributions.

Approval will not be granted where you are on LWOP to pursue other career opportunities, even if your host employer is willing to pay employer contributions.

If you wish to maintain member contributions during LWOP, payments can be made by BPAY. You can also choose to pay by direct debit by completing the Member Direct Debit Request (DDR) form included with the Leave without pay form.

We are unable to accept cheque, money order or cash payments. Contact Super SA for more details.

6. Options for your lump sum entitlement

When you are eligible to receive a lump sum entitlement from the Lump Sum Scheme you have the option of keeping your money with Super SA.

The Super SA Flexible Rollover Product (FRP)

This provides a low cost place to invest your super money while you decide what to do with it in the long term. You need a minimum balance of \$1,500 to get started. You also have the opportunity to consolidate your funds into a single account and create an account for your spouse/putative spouse.

See the **FRP Product Disclosure Statement**, available on the Super SA website.

The Super SA Income Stream

The Super SA Income Stream offers you a flexible income stream in retirement, where you can choose an amount of income, above a minimum level, to be paid to you on a regular basis – just like a salary. The Income Stream also gives you access to your capital whenever additional cash is needed. The opening balance required is a minimum amount of \$30,000.

See the **Income Stream Product Disclosure Statement** available on the Super SA website.

7. Transition to Retirement

7.1 Understanding Transition to Retirement

SA Government employees now have greater flexibility with both their super and working arrangements as they approach retirement.

Once you reach age 60, the Transition to Retirement (TTR) rules allow you to receive part of your super entitlement as an income stream, such as through the Super SA Income Stream. You can use an income stream to supplement your income when you reduce your working hours or salary. You cannot take any portion of your super as a lump sum cash payment.

Eligibility criteria for TTR

To be eligible for TTR you must:

- have reached age 60
- have entered into an agreement with your employer to reduce your hours of employment, or undertake duties which reduce your salary
- undertake your TTR arrangement with a view to future retirement.

Amount of super that can be accessed under TTR rules

As a general rule, the maximum proportion that you can access from your Lump Sum Scheme entitlement under TTR rules is equivalent to the proportion of your salary reduction reflected in your TTR arrangement.

In addition to the maximum amount described above, 100% of any PSESS¹⁰ account can be rolled over into an income stream.

Examples of arrangements are available at supersa.sa.gov.au.

How TTR arrangements affect points

There will be a reduction in the points you have already accrued and a reduction in the number of points you accrue in the future.

For example, 20% of Cathy's total entitlement is taken as a TTR entitlement so the points reduction will be approximately 20% of the total number of points.

Once she takes her TTR entitlement, Cathy must contribute at her standard member contribution rate of 6% of her salary (i.e. \$64,000 x 6% = \$3,840), and she will only accrue 9.6 points per year (i.e. 12 x \$64,000 ÷ \$80,000).

Other important information

- The percentage reduction in employment applicable to a TTR arrangement is determined by you in conjunction with your employer
- If you have a Triple S Account you may also be able to roll this into an income stream under a TTR arrangement
- You can roll 100% of your PSESS Account into an income stream under TTR rules
- When you roll any portion of your entitlement into the Super SA Income Stream (minimum account balance of \$30,000), 15% contributions tax will be deducted from the Taxable (untaxed) component
- Your income stream payment must be between 4% and 10% of the account balance until you reach age 65.
- Investment earnings on your Income Stream will be taxed at up to 15%

- Your salary and member contributions will be adjusted effective from the date your TTR commences. You must contribute at your standard contribution rate, and points you accrue in the future will be calculated as a percentage of the standard accrual rate
- Your employer will continue to contribute at the prescribed rate, based on your post-TTR salary.

Other TTR options

TTR step-by-step process

1. Read the TTR information available on the Super SA website to determine eligibility conditions. You may also wish to attend a Super SA TTR seminar.
2. Seek professional financial advice when considering accessing TTR.
3. Contact Super SA to obtain a retirement quote.
4. Contact your HR or payroll office.
5. Once you have approval from your agency to enter into a TTR agreement, Super SA can provide you with a TTR quote.
6. When you have completed the TTR employment arrangement with your agency, Super SA will process the TTR.
7. If you vary your employment arrangement you may wish to review your TTR benefit.

SA Government employees are now able to take long service leave on a single day basis over an ongoing period of time as a means of phasing into retirement. This will have no impact on your super.

If you wish to do this, talk to your Human Resources Manager.

If you have any questions, please contact Super SA on 1300 369 315 or email supersa@sa.gov.au.

¹⁰ Some members of the Lump Sum Scheme have a Public Sector Employee Superannuation Scheme (PSESS) entitlement. If you have a PSESS Account it will be shown on your Annual Statement.

8. Fees, costs and taxes

The following section explains how fees and costs are applied to the Member Component of the Lump Sum Scheme benefit. Some members may also have a PSESS and/or SG Account, which forms part of their Employer Component.

8.1 Fees and costs summary

The fees and costs below may be deducted from your super, from the returns on your investment or from the fund assets as a whole. Fees and costs for particular investment options appear on the following page.

You should read all of the information about fees and costs, as it is important to understand their impact on your investment.

Lump Sum Scheme Balanced option		
Type of fee or cost	Amount	How and when paid
Ongoing annual fees and costs ¹¹		
Administration fees and costs	0.05% p.a.	The administration fee is deducted from the funds invested with Funds SA before the declaration of unit prices. A notional administration fee is therefore applied to your Member and Rollover accounts.
Investment fees and costs ¹²	0.54% p.a.	Deducted from the Scheme's investment returns, before earnings are allocated to your account.
Transaction costs	0.12% p.a.	Deducted from the Scheme's investment returns, before earnings are allocated to your account.
Member activity related fees and costs		
Buy-sell spread	Nil	Not applicable
Switching fee	Nil	Not applicable
Family Law fees		
Request for Information	\$176	Payable on application by BPAY at the time of the request.
Splitting of superannuation entitlement	\$176	

8.2 Annual administration fee

The cost of the administration of the Lump Sum Scheme is shared proportionally between members and employers:

- Scheme members pay 30% of the cost of administering the Lump Sum Scheme
- Employers pay 70% of the cost of administering the Lump Sum Scheme.

The member share of administration costs is deducted from unit prices, and as a result, before the earnings achieved by Funds SA are credited to your Member Account or Rollover Account. This has the effect of reducing the investment earnings allocated to your Member Account or Rollover Account, with the actual reduction different for each member, depending on the balance of their Member Account or Rollover Account.

¹¹ The investment management costs for the 2024-25 year and varies across investment options. Investment management costs vary from year to year.

¹² Investment fees and costs includes an amount of 0.11% for performance fees. The calculation basis for this amount is set out under the Investment fees section on the next page.

8. Fees, costs and taxes (continued)

Example of annual fees and costs

This table gives an example of how the ongoing annual fees and costs for the Balanced investment option (within the Member Component) for this superannuation product can affect your superannuation investment over a 1-year period. You should use this table to compare this superannuation product with other superannuation products.

The Member Component is made up of your Member Account (your member contributions plus investment earnings) and your Rollover Account (amounts you may have rolled into the Scheme from other super funds, plus investment earnings).

Example:		
Balanced investment option		BALANCE OF \$50,000
Administration fees and costs	0.05% p.a.	For every \$50,000 you have in the Balanced option, you will be charged or have deducted from your investment \$25 in administration fees and costs
PLUS Investment fees and costs	0.54% p.a.	And , you will be charged or have deducted from your investment \$270 in investment fees and costs
PLUS Transaction costs	0.12% p.a.	And , you will be charged or have deducted from your investment \$60 in transaction costs
EQUALS Cost product		If your balance was \$50,000, at the beginning of the year, then for that year you will be charged fees and costs of \$355 for the Balanced option.

Note: Additional fees may apply.

Competitive fees

It is not possible to negotiate lower fees within the Lump Sum Scheme.

8.3 Investment fees

Funds SA is responsible for managing all Lump Sum Scheme investments. Investment fees vary depending on your choice of investment option in the Member Component.

The investment fee includes fund manager fees and applicable performance fees, transaction and operational costs, such as asset consulting fees, custodian fees, investment-related legal advisory fees, and an administration fee that covers expenses incurred by Funds SA in managing the funds.

The table on the following page includes investment fees and transaction costs.

Transaction costs include brokerage, stamp duty, transaction settlement costs, clearing costs, buy and sell spreads and other acquisition and disposal costs.

These fees and costs are deducted from the assets of the investment option and reflected in the unit price.

For more information on investment options please refer to supersa.sa.gov.au.

The total investment fees include a performance fee. This is an additional fee paid to certain managers if their return on a particular investment option performs above the agreed benchmark.

A performance fee will not be paid if a matching period of underperformance has occurred in that year.

Investment Fees and Transaction Costs

Rounding of 0.01% has been used where appropriate in tables for ease of understanding.

Information in the table below covers Investment Fees and Transaction Costs for the Member Component. The Member Component is made up of your Member Account (your member contributions plus investment earnings) and your Rollover Account (amounts you may have rolled into the Scheme from other super funds, plus investment earnings).

Did you know?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns.

For example, total annual fees and costs of 2% of your scheme balance rather than 1% could reduce your final return by up to 20% over a 30-year period (e.g. reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify the higher fees and costs.

To find out more

If you would like to find out more or see the impact of fees based on your own circumstances, the Australian Securities and Investments Commission (ASIC) website, www.moneysmart.gov.au, has a superannuation calculator to help you check out different fee options.

8. Fees, costs and taxes (continued)

The amount you pay for specific investment options p.a.¹³

Investment options (Member Component)	Investment fees and costs	Transaction costs
High Growth	0.59%	0.13%
Socially Responsible	0.37%	0.06%
Balanced	0.54%	0.12%
Moderate	0.45%	0.09%
Stable	0.41%	0.08%
Capital Defensive	0.34%	0.06%
Cash	0.05%	0.00%

Information in the table below covers Investment Fees and Transaction Costs for the Employer Component (if applicable). If you have a PSESS and/or SG Account, it is invested in the Defined Benefit High Growth option, which is the investment for employer funded entitlements. Investment choice is not available for your PSESS and/or SG Account because these form part of your Employer Component.

Investment option (Employer component ¹³)	Investment fees and costs p.a.	Transaction costs p.a.
Defined Benefit High Growth	0.95%	0.15%

Performance Fees

Please note that performance fees are included in the Investment fees and costs set out in the tables above and are not an additional cost.

Investment options	Performance fees p.a. ¹⁴
High Growth	0.13%
Socially Responsible	0.05%
Balanced	0.11%
Moderate	0.07%
Stable	0.06%
Capital Defensive	0.04%
Cash	0.00%
Defined Benefit High Growth	0.30%

Cost of product for 1 year

The below cost of product gives a summary calculation about how ongoing annual fees and costs can affect your super investment over a 1-year period within the Member Component. The cost of product assumes a balance of \$50,000 at the beginning of the year. You can use the below table to help compare superannuation products and investment options.

Investment options	Cost of product
High Growth	\$385.00
Socially Responsible	\$240.00
Balanced	\$355.00
Moderate	\$295.00
Stable	\$270.00
Capital Defensive	\$225.00
Cash	\$50.00

8.4 Tax

Unlike most other types of savings, super savings are taxed concessional. To ensure your entitlement is taxed at concessional rates, you must provide your tax file number (TFN) to Super SA. If you do not, you may pay tax at a higher rate.

The Australian Taxation Office (ATO) classifies the Lump Sum Scheme as an untaxed fund, so while your entitlement is growing no tax is paid on your:

- Employer contributions and
- Investment returns.

Instead, you will pay tax when your entitlement is paid, in line with the ATO rules for untaxed funds.

Member contributions made from after-tax salary since 1 July 1983 are always tax-free when received as a lump sum payment.

¹³ For the 2024-25 year. Investment management costs vary from year to year.

¹⁴ 5 year average to 30 June 2025.

8. Fees, costs and taxes (continued)

Superannuation lump sums

The lump sum amount you receive when you are eligible to claim your super is known as a “superannuation lump sum”. You can either take it immediately in cash or roll it into another fund (or a combination of both). The method you choose will affect how you are taxed.

A superannuation lump sum can be made up of the following tax components:

- the Tax free component
- the Taxable (untaxed) component
- the Taxable (taxed) component.

How your superannuation lump sum will be taxed if cashed

When received as a cash entitlement the Taxable (untaxed) component will be taxed as follows depending on your age:

If you have rolled funds into the Lump Sum Scheme from a taxed fund, the Taxable (taxed) component will be taxed as follows depending on your age:

Table 1: How tax is calculated on the Taxable (untaxed) component^{15,16}

Your age	Tax on Taxable (untaxed) component
Under age 60	30% maximum tax rate up to \$1,865,000 ¹⁷
60 or over	15% tax on amounts up to \$1,865,000 ¹⁷

Note: The 2% Medicare levy is also deducted when tax is payable and you take all or part of your lump sum entitlement in cash.

Table 2: How tax is calculated on the Taxable (taxed) component^{15,16}

Your age	Tax on Taxable (taxed) component
Under age 60	20% maximum rate (no limit)
60 or over	Tax free

How your superannuation lump sum will be taxed if rolled over

If you choose to roll over your superannuation lump sum into the Super SA Flexible Rollover Product (or another taxed superannuation fund), 15% contributions tax will be deducted from the Taxable (untaxed) component¹⁸.

When your untaxed component is rolled over to a taxed fund, the Medicare levy is not payable.

Taxable (untaxed) amounts over \$1,865,000 will be taxed at the top marginal rate plus Medicare levy on rollover. This cap is for the 2025-26 financial year.

Once the superannuation benefit is in a taxed superannuation fund, any cash withdrawals will be taxed as detailed in Table 2 above.

Proportioning of payments

Any payment taken in cash or rolled over to another fund must have the tax components calculated in the same proportion to the components that make up your total entitlement. You cannot select only your Tax free component (i.e. your member after-tax contributions). This means that payments in cash or rollovers to another fund will contain taxable amounts and you may be required to pay tax on these.

Tax payable upon your terminal illness or death

If your entitlement is paid due to a terminal illness, it will be tax free.

If you die, your lump sum entitlement is tax free if it is paid to your spouse/putative spouse (see Glossary).

If you die but have no spouse/putative spouse, your lump sum entitlement will be paid to your Estate.

If you die and have eligible children, they will receive a pension as described in section 5.7. The pension will be taxed at marginal tax rates.

Division 293 tax for high income earners

If the sum of your income and relevant concessional tax contributions is over \$250,000 per year, you'll be taxed at 15% of your relevant concessional contributions above the \$250,000 threshold. If you are liable for the tax you'll receive notification from the Australian Tax Office (ATO) advising you of the amount payable and your payment options.

The ATO will issue a Division 293 tax amendment that may be made up of:

- A due and payable amount in respect of accumulation interests
- A deferred payment in respect of defined benefit interests.

For information about your payment options, including the option to have your Division 293 tax liability paid from your Super SA account, please refer to the Division 293 Tax fact sheet on the Super SA website. It is also noted that different rules apply to individuals who are classified as ‘State Higher Level Office Holders’ whose employers make certain contributions to constitutionally protected funds. They are generally exempt from Division 293 tax unless the contributions are made as part of a salary package (i.e. salary sacrifice).

8.5 Surcharge

This tax was imposed by the Australian Government on your surchargeable contributions (employer contributions) once your income reached certain levels. The surcharge rate was reduced to zero on 1 July 2005. Any surcharge liability accrued prior to 1 July 2005 is still payable.

15 Assumes TFN provided. If you do not provide your TFN you will be taxed at the highest marginal tax rate plus Medicare levy.

16 When you lodge your next tax return, if your marginal tax rate is lower, you may be eligible for reduced tax. Please visit www.ato.gov.au for more information.

17 Taxable (untaxed) amounts over \$1,865,000 will be taxed at the top marginal rate plus Medicare levy. This cap is for the 2025-26 financial year.

18 Important note: Australian Government preservation rules are different from preservation rules in the Lump Sum Scheme. You need to be aware of this if you are rolling money out of the Lump Sum Scheme and into the Super SA Flexible Rollover Product or another super scheme.

9. Member communication

General Information and Financial Advice

Getting good financial planning advice is an essential part of any retirement plan. As a Lump Sum Scheme member, you have the option of calling Super SA's Member Services team for general information or for personal financial planning advice, speaking with a professional financial planner.

Member Services

Member Services is a good place to start when you're looking for ways to make the most of your investment in super.

Member Services can't provide you with personal financial advice but can provide you with factual information relating to our products, like informing you of the investment options we offer. Should you wish to obtain personal financial advice you should consult a financial planner. To speak to Member Services, call 1300 369 315.

Member Education team

Super SA's Member Education team are a dedicated team whose sole purpose is to educate Super SA members and agencies.

The Member Education team regularly release articles and videos to keep you up to date. Super SA members have access to online and in-person seminars which explain the complex superannuation landscape in easy to understand sessions. Super SA understands that sometimes it's easier for us to come to you, so we facilitate worksite visits which can range from a one off seminar to a complete series. To book one of Super SA's highly experienced and qualified Member Education team members please contact superbookings@sa.gov.au.

Personal financial planning advice

You are encouraged to seek professional advice in relation to your financial planning needs.

Member portal on the Super SA website

This is available on the Super SA website and enables you to keep track of your super in a secure internet environment 24 hours a day, seven days a week. Your privacy when using the Super SA member portal is assured at all times.

Using the retirement quote function in the member portal, Lump Sum Scheme members can work out how much super they will have in retirement if they vary their hours of employment or change their contribution rate for all or part of their remaining service until they retire.

You can also check your current Member Account, Rollover Account and PSESS Account balances and contributions.

To register, visit the Super SA website at supersa.sa.gov.au and sign in to the member portal for full details. You will need your Super ID.

10. Additional information

Personal financial planning advice

At Super SA, we encourage you to seek professional financial advice on your financial planning needs.

If you don't have an existing relationship with a planner, you can contact the Financial Planning Association and access their "Find a Planner" service to locate an FPA member near you.

10.1 Super co-contribution scheme

If your total income is less than \$62,488 in a financial year and you make after-tax contributions to your super in the same year, such as fortnightly after-tax contributions as part of your Lump Sum Scheme membership or one-off contributions during the financial year, the Australian Government will contribute up to \$0.50 for every \$1.00 you contribute, to a maximum of \$500.

To receive the maximum amount, your total income must be \$47,488 or less and you must contribute at least \$1,000. Check out the table in Additional Information to see how much you might be entitled to. The minimum amount you can receive is \$20.

The amount of co-contribution paid depends on your income and the personal after-tax contributions you made during the financial year.

Only a person's after-tax super contributions attract a co-contribution. Before-tax (salary sacrifice) contributions are considered to be employer contributions and will not attract a co-contribution.

Qualifying for a co-contribution

To receive the Government's co-contribution you need to satisfy all of the following conditions: You must provide Super SA with your TFN and:

- make fortnightly after-tax contributions to your super as part of your Lump Sum Scheme membership during the financial year
- or make one-off lump sum contributions during the financial year
- have a total income¹⁹ less than \$62,488²⁰
- have a total superannuation balance less than the general transfer balance cap at the end of 30 June of the previous financial year
- not hold a temporary visa at any time during the financial year (unless you are a New Zealand citizen or it was a prescribed visa)
- be less than 71 years of age at the end of the financial year
- pass the two income tests (income threshold and 10% eligible income tests)
- lodge your tax return for the relevant financial year
- have a total superannuation balance less than the general transfer balance cap at the end of 30 June of the previous financial year
- not have contributed more than your non-concessional contributions cap.

Visit www.ato.gov.au for more information on the super co-contribution.

Payment of your co-contribution

If you receive a co-contribution payment, it will be paid into an account set up for you in Triple S. Under the rules of the Lump Sum Scheme, the co-contribution payment cannot be made or rolled over into your Lump Sum Scheme account. If you have more than one super fund, the ATO will decide which fund the co-contribution goes into, or you can nominate a fund of which you are a member, providing the fund rules permit acceptance of co-contributions.

Co-contributions will be preserved in the fund and can be accessed when you meet the prescribed conditions of release, generally when you have permanently retired after reaching age 60.

And your total income is:	Maximum co-contribution amount available	After-tax contribution amount required to receive maximum co-contribution
\$47,488 or less	\$500	\$1000
\$48,488	\$467	\$934
\$50,488	\$400	\$800
\$52,488	\$333	\$666
\$54,488	\$267	\$534
\$56,488	\$200	\$400
\$58,488	\$133	\$266
\$60,488	\$67	\$134
\$62,488	\$0	\$0

Timing of payments

After you have lodged your tax return for the financial year in which you made personal contributions, the ATO will calculate the amount of co-contribution that you're entitled to and send this to your super fund to credit your account.

Any enquiries in relation to the co-contribution being paid should be directed to the ATO www.ato.gov.au.

After-tax contributions and the Lump Sum Scheme

Lump Sum Scheme members make fortnightly after-tax contributions to their super as part of their Lump Sum Scheme membership. The Scheme does not allow members to make one-off lump sum contributions in addition to the after-tax contributions that are required under the rules of the Scheme.

Tax file number

Your tax file number (TFN) is required to process your co-contribution. If you have already provided this information it will be indicated on your Annual Statement.

If you have not yet supplied your TFN, you can either do so in writing or via the Super SA website. To notify us in writing, download the **Tax File Number Notification** form from the Super SA website and post it to us.

¹⁹ Salary sacrifice contributions will be counted as income when determining your eligibility for the super co-contribution and other government benefits.

²⁰ To receive the maximum co-contribution of \$500 you need to contribute at least \$1,000 after-tax and earn \$47,488 or less a year. The co-contribution you can receive reduces on a sliding scale, and phases out altogether when your income reaches \$62,488. For the 2025-26 financial year.

10. Additional information (continued)

10.2 Superannuation and the breakdown of marriage and de facto relationships

The *Superannuation Act 1988* has been amended to complement the provisions of Part VIIIB of the *Family Law Act 1975*.

The amendments enable a non-member spouse or de facto to have their share of a member spouse superannuation interest, as determined under a Superannuation Agreement or a Family Court Order, established as a separate interest in their own name.

Under the legislation, super entitlements do not have to be split. By sharing other assets the parties may avoid splitting a super account.

A Superannuation Agreement or a Family Court Order can allocate either a dollar amount or a specified percentage of a member's total super to their former spouse, who has the choice of leaving it with Super SA, rolling it into a fund of their choice, or cashing it out, subject to Australian Government preservation rules (see Glossary).

If your spouse chooses to leave their portion with Super SA, it must be rolled into Triple S.

Members and their spouses or former spouses can obtain family law valuation information from Super SA on their super entitlements to assist in obtaining a fair and equitable property settlement.

Family Law legislation only applies to de facto relationships that break down after 30 June 2010.

For full information see the **Superannuation and the breakdown of relationships** information sheet available on the Super SA website.

Super SA charges fees for the provision of information and for splitting a super account. The fees for each service are currently set at:

- Processing and responding to an application for information: \$176 each request. Fees applicable to the request for information are payable at the time of the request.
- Splitting an entitlement under a Splitting Agreement or Order: \$176 each party. Fees relating to the splitting of a super entitlement are payable at the time of request by each party.

Fees are subject to review. In the interests of the security of our members and staff, Super SA does not accept cash payment of fees. Payments can be made by BPAY. Contact Super SA for more details.

Up to date information on fees is available on the Super SA website.

11. Glossary of terms

Client ID

An overarching ID number given to members, used to open a second or subsequent Super SA account, such as a Super SA Income Stream, Flexible Rollover Product, Super SA Select or Triple S account.

Co-contribution

A payment made by the Australian Government to your super if you're a low income earner who makes after-tax contributions to your super (and you meet the other specified criteria).

If you receive a co-contribution you'll automatically become a Triple S member in order to receive the co-contribution. If you don't have a Triple S account, one will be created for you. For further information please refer to the Triple S PDS.

Australian Government preservation rules

These rules were established by the Australian Government. They relate to the conditions under which you can claim your super entitlement. These rules apply to funds rolled into the Lump Sum Scheme from another fund.

Any part of your Rollover Account that was subject to preservation before it was transferred to the Lump Sum Scheme will remain subject to Australian Government preservation requirements.

Preserved entitlements are preserved until you reach one of the following 'conditions of release':

- you have ceased an employment arrangement or retired permanently from the workforce having reached age 60
- you reach age 65
- you become totally and permanently disabled
- you suffer a terminal illness
- your death.

Unrestricted non-preserved amounts

Super that can be taken at any time because it meets all criteria for release. Please note that access to benefits in this scheme are subject to restrictions outlined in sections 1.3 and 5.

Restricted non-preserved amounts

Entitlements that employees can be paid on their termination of employment. They can also be paid at the time that preserved entitlements can be paid. The amount of your preserved and non-preserved entitlements are detailed on your Annual Statement.

Complying fund

A fund subject to the Australian Government's super regulatory regime which qualifies for concessional tax rates. The Lump Sum Scheme is deemed to be a complying fund.

Concessional contribution cap

An annual limit, set by the Australian Government, on pre-tax contributions allowable to taxed super funds. While the Lump Sum Scheme (and Triple S) are both untaxed with no annual cap applied to these schemes, pre-tax contributions made into untaxed schemes count towards your annual Concessional Contribution Cap with a taxed fund. This may impact you if you are making contributions to another super fund.

Concessional contributions

Contributions from an employer (including any salary sacrifice contributions) made into taxed super funds.

Concessional tax

This is a reduced rate of tax. Super is taxed at lower rates than many other forms of investment.

Contributions Superannuation Salary

The salary used for super contribution purposes. Each 31 March your payroll office notifies Super SA of your employment hours and salary which is used to determine your member contributions for the next financial year.

Current unit price

This is the current unit price for your elected investment option. Unit prices are updated twice weekly.

Date joined scheme

The date you joined the Lump Sum Scheme.

Eligible child/student

In relation to a deceased member, an eligible child/student is:

- a. i. a child of the member, or
- ii. a child in relation to whom the member had assumed parental responsibilities and who was cared for and maintained, wholly or in part, by the member up to the date of the member's death

and is:

- b. i. under the age of 16 years, or
- ii. between the ages of 16 and 25 years and in full-time attendance at an educational institution recognised by the Board for the purposes of this definition.

Eligible service date

This is the earlier of either:

- the date you last began continuous service with the SA public sector
- the date brought with your super from a former fund when you rolled your super over into the Lump Sum Scheme.

11. Glossary of terms (continued)

Employer Component

Your super is made up of an Employer Component and a Member Component.

Your Employer Component is, in most cases, defined and calculated using:

- your age at joining and exiting the Lump Sum Scheme
- number of months of contributory membership
- elected contribution rate
- proportion of time worked during your contributory membership.

You may also have a Public Sector Employee Superannuation Scheme (PSESS) entitlement which may form part of your Employer Components.

Entitlements Superannuation Salary (ESS)

Your full-time equivalent annual salary at the time of application for entitlement. While you only pay contributions based on your substantive salary, if you have been in receipt of a higher duties allowance continuously for 12 months or more when you apply for your entitlement, your ESS will be based on the higher salary.

If you are on a fixed term appointment (including a Curriculum Guarantee position), please refer to the **Contracts or acting arrangements of 12+ months** fact sheet for more information on your retirement entitlements.

Extrapolate

Extrapolate means to estimate a future figure based on known data, assuming that the estimated figure follows logically from the known data.

In the case of working out your disablement or death entitlement, Extrapolated Points take into account your Accrued Points and then assume you would have continued accruing Points in the scheme until age 55 had it not been for disablement, or age 60 in the case of death before age 55.

For a disablement entitlement before age 55 your Extrapolated Points equal your Accrued Points plus the number of months from the date of the disablement to age 55.

For a death entitlement before age 55 your Extrapolated Points equal your Accrued Points plus the number of months between the date of death and age 60.

Extrapolated Points are adjusted for part-time service over the whole of your contributory membership (if any).

Investment Choice

Your choice of investment options include:

- High Growth
- Socially Responsible
- Balanced (default)
- Moderate
- Stable
- Capital Defensive
- Cash

Investment earnings

Your Member Account, Rollover Account and PSESS Account within your Lump Sum account are subject to investment performance and therefore fluctuations in investment markets can affect your account balances. In some circumstances, the Employer component is a multiple of Notional Member Account or Member Account and any fluctuations that affect your Member Account will also be reflected in your Employer component.

Investment Time Horizon

The minimum length of time needed to reach the earning potential of your investment.

Member component

Your Member Component in your Lump Sum scheme account is made up of your:

- Member Account
- Rollover Account (if any)

Your Member Account is made up of the contributions you have made to the Lump Sum scheme plus any investment earnings.

Member contribution rate and member contribution amounts

The percentage and dollar amount of your super salary that you have elected to contribute to the Lump Sum Scheme. Over the period of your membership, you must average your 6% standard contribution rate to be eligible for the maximum employer entitlement.

Member portal

Accessible through the Super SA website, the member portal provides you with access to your super information, including personal details, annual statements, account balances and your contribution history. You need your Super ID to sign in, which is different to any other Super SA account or client ID you may have.

Non-concessional contributions

After-tax member contributions made to super. These contributions will not be taxed when you leave the scheme. Non-concessional contributions form part of your "tax free component".

11. Glossary of terms (continued)

Non-concessional contribution cap

There is a limit, set by the Australian Government, of \$120,000²¹ each financial year for after-tax contributions you can make. If you are under 75 you can bring forward the limit for two years to contribute up to \$360,000 in one year. Please visit www.ato.gov.au for more information.

After-tax contributions you make to other super schemes (e.g. Triple S or other personal super funds) will count towards the non-concessional contribution cap. If you breach the cap, you will be taxed at the highest marginal rate on the excess amount.

Individuals with a total super balance above \$2 million will no longer be able to make non-concessional contributions, except where required to do so as part of a defined benefit scheme such as the Lump Sum Scheme where after-tax contributions are required.

If your total super balance is over \$2 million and you are making non-concessional contributions to the Lump Sum scheme, you will receive a release authority form from the Australian Taxation Office (ATO) to remove the non-concessional contributions that have been contributed to your account. You are unable to have the funds released from the Lump Sum Scheme but you may be able to have them released from an accumulation scheme (if applicable). If you cannot or choose to not remove the funds from a superannuation account you will receive a tax bill from the ATO, for further information on this please contact the ATO.

Non-contributory member

A member who has ceased employment or who does not meet the requirements of being an Active member. Non-contributory members also include preserved members who are not active and have not received an employer contribution in 12 months or more.

If you are a non-contributory member, you will not accrue any points during this period and you cannot catch up the points that you have missed.

Notional Member Account

The amount you would have accrued had you contributed at the rate of 6% throughout your contributory membership.

Preservation in the Lump Sum Scheme

Amounts for members under age 55 that must be preserved remain preserved until:

- retirement at or after age 55
- your total and permanent disablement or
- your death.

Amounts preserved in the Lump Sum scheme may be claimed at age 55 even if you are working in the private sector or have returned to the SA public sector after a break of at least one month. If you have a Rollover Account with a preserved entitlement, this portion is subject to Australian Government Preservation rules.

Preserved entitlements

Preserved entitlements are the part of your super entitlement which must be retained in your account until you reach the age of 55 and are eligible to claim your entitlement, or if you become totally and permanently disabled, or die.

Public Sector Employee Superannuation Scheme (PSESS)

Some members may also have a Public Sector Employee Superannuation Scheme entitlement, which forms part of their Employer Component. The PSESS was introduced by the State Government on 1 January 1988 in lieu of a pay increase for SA Government employees. It represented a payment equal to 3% of your salary and was paid into your PSESS Account. PSESS closed on 30 June 1992.

Putative spouse

See Spouse.

Rolling in

Your super contributions invested with other funds can be transferred to the Lump Sum Scheme. This is called "rolling in" your funds. By consolidating your super into one account you can minimise the fees that you pay.

You may wish to seek financial advice regarding rolling your funds into the Lump Sum Scheme.

Super SA does not charge fees to roll in funds. You should also consider your insurance or other benefits with your other super fund before rolling in.

To consolidate your other super into the Lump Sum Scheme, connect your MyGov account with the ATO. Access your MyGov account at www.my.gov.au. From there you can locate your other super accounts and click online to request they are transferred to Super SA.

Alternatively, you can complete one **Consolidate your super** form for each super account you want to roll in. The **Consolidate your super** form is available on the Super SA website. Send your form(s) to Super SA. We will let you know when the roll in has been received.

Your roll in will be invested in the same investment option as your current Super SA contributions.

However, it's important to keep in mind that any part of your rollover that was subject to preservation before it was transferred to the Lump Sum Scheme will remain subject to the Australian Government's preservation requirements.

You will not be able to access or roll out any of the funds you rolled in while you are still working for the SA public sector. This includes any funds that are non-preserved.

Rollover Account

Your Rollover Account comprises:

- amounts you have rolled in from other funds, plus
- investment earnings.

Your Rollover Account is subject to fluctuations in the investment market.

If you have not rolled funds into the Lump Sum Scheme from another super fund you will not have a Rollover Account.

Once you have ceased employment with the SA public sector, rollover funds are payable subject to Australian Government preservation rules.

Salary at last 31 March

The full-time equivalent salary Super SA was last advised by your payroll office (on the previous 31 March). Super SA only receives notification of your salary once each year on 31 March, and applies this salary for the whole of the following financial year.

²¹ Between 1 July 2021 and 30 June 2030, you can re-contribute amounts withdrawn under a COVID-19 early release. These amounts won't count towards your non-concessional contributions cap, but you can only re-contribute up to the amount withdrawn and you cannot claim a tax deduction for re-contributed amounts. Please refer to the ATO website for more details and to obtain the required form.

11. Glossary of terms (continued)

Salary projected to retirement date

The salary at last 31 March, projected to your retirement date and based on the inflation rate.

Salary sacrifice

Personal before-tax salary contributions made from your salary before Pay As You Go tax is deducted. These amounts are classified by the ATO as employer payments and therefore reduce your annual salary for taxation purposes.

Spouse/putative spouse

Your spouse is the person to whom you are legally married.

A person is the putative spouse of a member if the person and the member are cohabiting as de facto spouses and:

- have been so cohabiting continuously for the preceding three years, or for a total of not less than three out of the four preceding years, or
- a child of whom both persons are the parents has been born.

A person is also recognised as a putative spouse of the member if in a Registered Relationship with the member (within the meaning of the *Relationships Register Act 2016*).

Standard risk measure²²

This is a measure of risk that allows members to compare investment options. The risk measure expresses risk as the number of negative annual returns likely over any 20 year period.

Super ID

Your Super SA identification number. Quote this number when you contact Super SA. Use your Super ID to access the member portal.

Superannuation salary

This is determined in accordance with the *Superannuation Act 1988* and the relevant enterprise agreement or award under which you are employed. It comprises:

- what you are paid for the hours you are normally required to work
- allowances (excluding leave loading) received which do not represent a payment for an expense you incurred.

If you are an executive employed under a Total Employment Cost (TEC) contract, your superannuation salary is 82.5% of the value of the total remuneration package specified in the contract.

Superannuation Guarantee (SG)

The minimum level of super entitlement that must be provided to you by your employer and is currently set at 12% of gross superannuation salary, which is the total you are paid for your normal hours of work, including leave loading and certain allowances. In the Lump Sum Scheme the employer contribution rate is greater than SG.

Surcharge liability

The tax imposed by the Australian Government on your surchargeable contributions once your income reaches certain levels. The surcharge was reduced to zero on 1 July 2005. Any surcharge liability accrued prior to 1 July 2005 is still payable.

Taxable (taxed) component

A component of your superannuation lump sum from which contributions and investment tax have been deducted. This includes any super you have rolled over into the Scheme from a taxed fund.

Taxable (untaxed) component

A component of your superannuation lump sum from which tax will be deducted when you leave the fund. This includes your Employer Component.

Tax file number (TFN)

The identification number allocated to you by the Australian Taxation Office. To ensure your entitlement is taxed at concessional rates, you must provide your TFN to Super SA. If you do not, you may pay tax at a higher rate.

Tax free component

A component of your superannuation lump sum which will not be taxed when you leave the fund. This includes any after-tax contributions and pre-1983 amount (if any).

Unique Superannuation Identifier (USI)

Uniquely identifies a super fund's products for the purposes of electronic rollovers. The USI dictates the end destination point of the information being sent about a contribution or a rollover. If the fund you are rolling from does not have a USI use the fund's SPIN.

Unit

Super contributions are used to purchase investment units, which represent a share of the underlying investments in your particular super investment option.

Untaxed fund

The Lump Sum Scheme is an untaxed fund. This means that the Australian Government's tax on employer contributions and investment earnings is not paid during your membership. While taxed super funds pay a 15% tax on all employer contributions received, and up to 15% on the investment earnings, in the Lump Sum Scheme tax is not deducted until the entitlement is paid.

²² The Standard Risk Measure is based on industry guidance to allow members to compare investment options that are expected to deliver a similar number of negative annual returns over any twenty year period. The Standard Risk Measure is not a complete assessment of all forms of investment risk, for instance, it does not detail the likely size of a negative return or the potential for a positive return less than a member may require to meet their financial goals. It also does not take into account the impact of administration fees and tax on a negative return. Members should ensure they are comfortable with the risks and potential losses associated with chosen investment options.
